

Chapter 1: Xpediter Facilities

Debugging Tools: Standard and Interactive..... 1
Xpediter: What it is 1
Xpediter: Advantages 2
Compiler Options 2
Interactive and Batch Modes 3
Interactive versus Batch Modes 3
Batch Connect Facility 3
Xpediter/TSO Input and Output 4

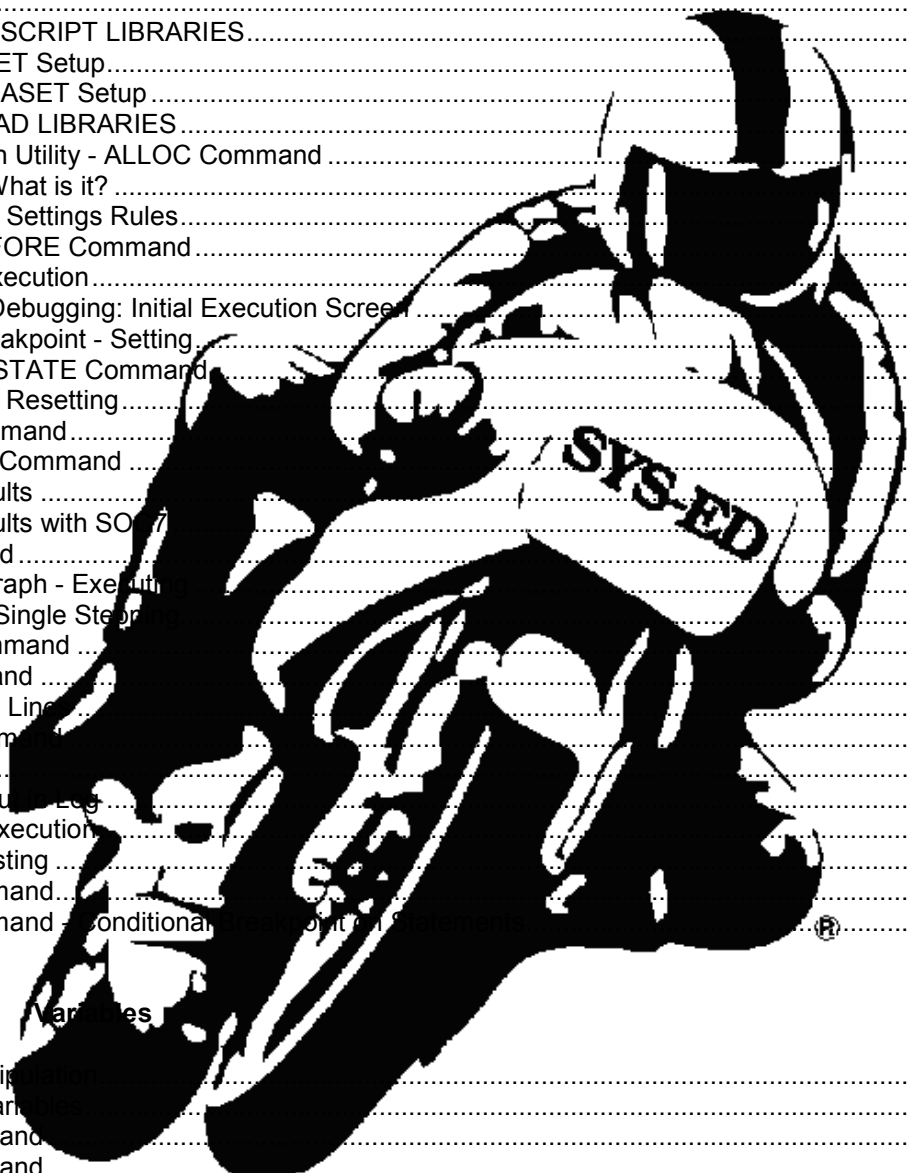

Chapter 2: General Rules and Format

Xpediter PRIMARY MENU 1
Screen Format 2
Commands 3
PF/PA Keys 4
SCROLL Values 4
SCREEN Commands 5
UTILITIES from PRIMARY MENU 6
UTILITIES MENU Selection 6
DDIO FILE FACILITY - Create 7
DDIO File Type 7
DDIO CREATE/FORMAT 8
Setup the Environment 9
SETUP MENU 9
Setup LOADLIB 10
Setup DDIO Dataset 10
PROGRAM PREFERENCE 11
Compile Facility 12
Compile Facility Settings 13
Compile Step 14
LINKEDIT STEP 15
Profile - DEFAULT 16

Chapter 3: Breakpoints

Foreground Program Execution: Startup Screen.....	1
SETUP MENU.....	2
ENVIRONMENTS MENU.....	2
LOAD MODULE LIBRARIES.....	3
DDIO FILES.....	4
INCLUDES - SCRIPT LIBRARIES.....	4
LOG DATASET Setup.....	5
SCRIPT DATASET Setup.....	6
DB2 DSNLOAD LIBRARIES.....	7
File Allocation Utility - ALLOC Command.....	8
Breakpoint: What is it?.....	9
Breakpoints - Settings Rules.....	9
AFTER / BEFORE Command.....	10
Command Execution.....	11
Foreground Debugging: Initial Execution Screen.....	12
BEFORE Breakpoint - Setting.....	13
AFTER ALL STATE Command.....	14
Breakpoints - Resetting.....	15
COUNT Command.....	16
COUNT ALL Command.....	17
COUNT Results.....	18
COUNT Results with SORT.....	19
GO Command.....	20
Single Paragraph - Execution.....	21
Breakpoint - Single Step.....	22
INSERT Command.....	23
SKIP Command.....	24
SKIP Several Lines.....	24
TRACE Command.....	25
TRACE ALL.....	25
TRACE Output Log.....	26
I/O Error in Execution.....	27
LOG Error Listing.....	28
WHEN Command.....	29
WHEN Command - Conditional Breakpoint.....	30

Chapter 4: Variables

Variable Manipulation.....	1
Displaying Variables.....	1
PEEK Command.....	3
KEEP Command.....	4
PEEK Command: Display Working-storage.....	5
PEEK RESET Command: Display Reset.....	7
PEEKH Command: Display Working-storage.....	8
KEEP Command: Keep a Variable.....	9
LOCATE Command: Locate Current Line.....	10
MOVE Command: Manipulating Variables.....	11
MOVE Command: Initialize a Variable.....	12
ACCEPT Command.....	13

Chapter 5: Utility Commands

ALLOC Command.....	1
BROWSE Command.....	3
INCLUDE Command.....	4
LOG Command.....	5
INTERCEPT Command.....	6
SET Command.....	7
SHOW Command.....	8
SHOW BEFORE.....	10
SHOW FILES.....	10
SHOW MODULE.....	11
SHOW OPTIONS.....	11
SHOW COUNT.....	12
Program Abends.....	13
ERROR DISPLAY.....	13
LOG DISPLAY.....	14
PEEK Display.....	15
Change Value.....	16
SHOW ALLOC.....	17
SHOW PROGRAM.....	18
SHOW PREV.....	18
SHOW WHEN.....	19
SHOW REGION.....	19

Chapter 6: Test Scripts

Test Script: What is.....	1
Test Script Types.....	1
Sample Script.....	1
TEST SETUP.....	2
INCLUDE LIBRARY.....	2
Executing with Initial Script.....	3
Testing Programs in Batch Mode.....	4
Starting a Session with Batch JCL.....	5
Batch Connect.....	6
BATCH MENU.....	7
PROCESS JCL.....	7
QUERY STATUS.....	8

Chapter 7: Debugging Stored Procedures

Db2 Stored Procedure - Debugging Support.....	1
Db2 Stored Procedure - Debugging.....	2
User Supplied WLM JCL.....	3
Select Job Step Screen.....	4
Interactive Debugging Connecting to a Job.....	5
Foreground Debugging of Db2 Stored Procedures.....	5
