

Chapter 1: SDF Fundamentals

What is SDF-II	1
Concepts and Terminology	2-3
SDF Environments	4
Default PF Keys	5
Panel and Line Commands	6
How to Obtain Help in SDF-II	7
Primary Commands	8

Chapter 2: Screen Design

Characteristics of the 3270	1-2
Order Entry Screen	3
Customer Display Screen	4
File Maintenance Screen	5
Customer Display by Sales Area	6
3270 Native-mode Programming	7-9
BMS Overview	10
Creating a Mapset	11-12
Data Formats	13-15
Send Maponly	16
Introduction	17-18
Screen design steps	19
Types of On-line Applications	20
Elements to be Considered in Determining Screen Format Type	21
Source of Input	22
Types of Operators	23
Response-time Requirements	24
Terminal Features	25
Type of Screen Formats	26
Example of a Blank Fixed Screen Format	27
Example of a Filled in Fixed Screen Format	28
Example of a Blank Adjacent Screen Format	29
Example of a Filled In Adjacent Screen Format	30
Another Example of the Adjacent Format	31
Example of a Check or Change Screen Format	32
Example of a Filled in Check or Change Screen Format	33
Example of the Free Format with Delimiters	34
Example of a Filled In Free Format Screen with Delimiters	35
Example of a Free Format Screen with Keywords	36
Example of a Free Format Screen with Keywords - Filled In	37
Example of a Selector Pen Screen Format	38
Example Menu to Select Customer	39
AN Example of a Selected Customer Account	40
Screen Design Guidelines	41
Screen Checklist	43-44
Diagramming Screen Sequences	45

SAVE	4
TEST	4
TOP	4
UP	4

Chapter 6: Line Commands

Use of Line Commands	1
General line commands	2
Define format	3-5
Separator	6
Quick field naming	7
Move a block	8
Basic Primary Commands	9
Define format	10-12

Chapter 7: Screen Commands

Screen Commands	1-4
Select a Panel Editor Dialog	5
Define Fields	6
Define Fields Column Descriptions	7
Format Element Position	8-10
Naming Fields	11
Define Fields	12-13
Field Attributes List	14
Define Attributes	15-16
Attribute Procedures	17-18
Define a Minor Structure	19
Define Structure	20
Define Structure Column Descriptions	21-22
Define Structure	23

Chapter 8: Primary Commands

Panel Commands	1
AUTOSAVE	2
CANCEL	2
CCANCEL	2
END	2
QUIT	3
QQUIT	3
RETURN	3
SAVE	3
BOTTOM	4
DOWN	4

Chapter 3: Screen Development

Select an SDF-II Function	1
Select a Profile Editor Dialog	2
Specify System Environment	3
Specify Overall Editing Defaults	4
Select a Window for Customization	5
Customize a Window	6
Specify Print Page Size	7
ISPF Parameter Options	8
PF Key Definitions and Labels	9
Select an SDF-II Function	10
Specify Libraries	11

Chapter 4: Panel Editor

Select an SDF-II Function	1
Identify Panel	2
Steps in Defining a Panel	3
Panel Selection	4
Define Panel Characteristics	5
Select a Panel Editor Dialog	6
Define Panel Characteristics	7-8
Define Format	9

Chapter 5: General Commands

General commands	1
AUTOSAVE	1
BOTTOM	1
CANCEL	1
CCANCEL	1
General Commands	2
DOWN	2
END	2
JUMP	2
LEFT	2
NUMBER	2
PRESERVE	2
General Commands	3
QUIT	3
QQUIT	3
REFRESH	3
RETURN	3
RIGHT	3
General Commands	4

LEFT	4
TOP	4
UP	5
JUMP	5
NUMBER	5
PRESERVE	6
RESTORE	7
TEST	7
TRANSFER	7
Panel Editor Commands	8
ATTRIBUTE	9
BOX	9
DELBOX	9
CAPS	10
COPYBLOCK	11
DELBLOCK	11
FIELDATTR	12
FORMAT	12
HEX	13
INITIAL	14
LINECMD	14
MARKS	15
MOVEBLOCK	15
NAME	16
NULLS	17
POSITION	18
REPEAT	19
Sample	19
SHOW	20
Define BMS Characteristics	21
Panel position	21
Panel Justification	21
LINE	21
COLUMN	21
WRITE CONTROL	21
ALARM	21
FREE KEYBOARD	21
RESET MDT	21

Chapter 9: Panel Editor Commands

Define BMS Characteristics	1
START Printer.....	1
PRINT Width.....	1
FIELD Format.....	1
I/O Area Prefix.....	1
Header and trailer.....	1
Outboard Format.....	1
Partition Name.....	2
Active Partition.....	2-4
Define Panel Instances.....	5
List Objects	6
Define Object List	6
Object Name	6
Library	6
Object Type.....	6
Sort	6
Specify Libraries in z/OS.....	7

Chapter 10: Generating Commands

Specify Search Argument	1
List Objects	2
List Objects Commands.....	3
List Objects	4
Line Commands for List Objects.....	5-7
Refresh	8
Generation Output.....	9
Identify Object for Generation	10
