

Chapter 1: Introduction

What is a Database? ..... 1

Traditional File Organization versus Database Organization ..... 1

The Objectives of a Database Management System ..... 2

What is IMS DB DL/1? ..... 3

IMS DB DL/1 ..... 4

Components of IMS-DL/1 ..... 5

DBD: Database Descriptor Block ..... 7

PSB: Program Specification Block ..... 7

PCB: Program Communication Block ..... 8

ACB: Application Control Block ..... 8

DL/1 Overview ..... 9

Application View ..... 10

Chapter 2: IMS-DL/1 Structure

Database Hierarchy ..... 1

Database Hierarchy Chart ..... 2

DL/1 Database Segments ..... 3

DL/1 Database Records ..... 5

Parent and Child Segments ..... 6

Twins and Siblings ..... 8

Segment Limits and Sensitivity ..... 9

Processing Options ..... 10

Key - Sequence Field ..... 11

Search Field ..... 12

DBDGEN Process ..... 13

DBDGEN Example ..... 15

PSBGEN Process ..... 17

PCB Example ..... 19

Chapter 3: Program Structure and Interfaces

Program Structure and Interfaces ..... 1

The Application Program Interface to DL/1 ..... 2

PCB Mask ..... 3

PCB Mask - COBOL Binding Example ..... 4

Calls to DL/1 ..... 5

Segment Search ..... 6

Unqualified SSA ..... 8

Qualified SSA ..... 8

Segment Search Argument Conventions ..... 9

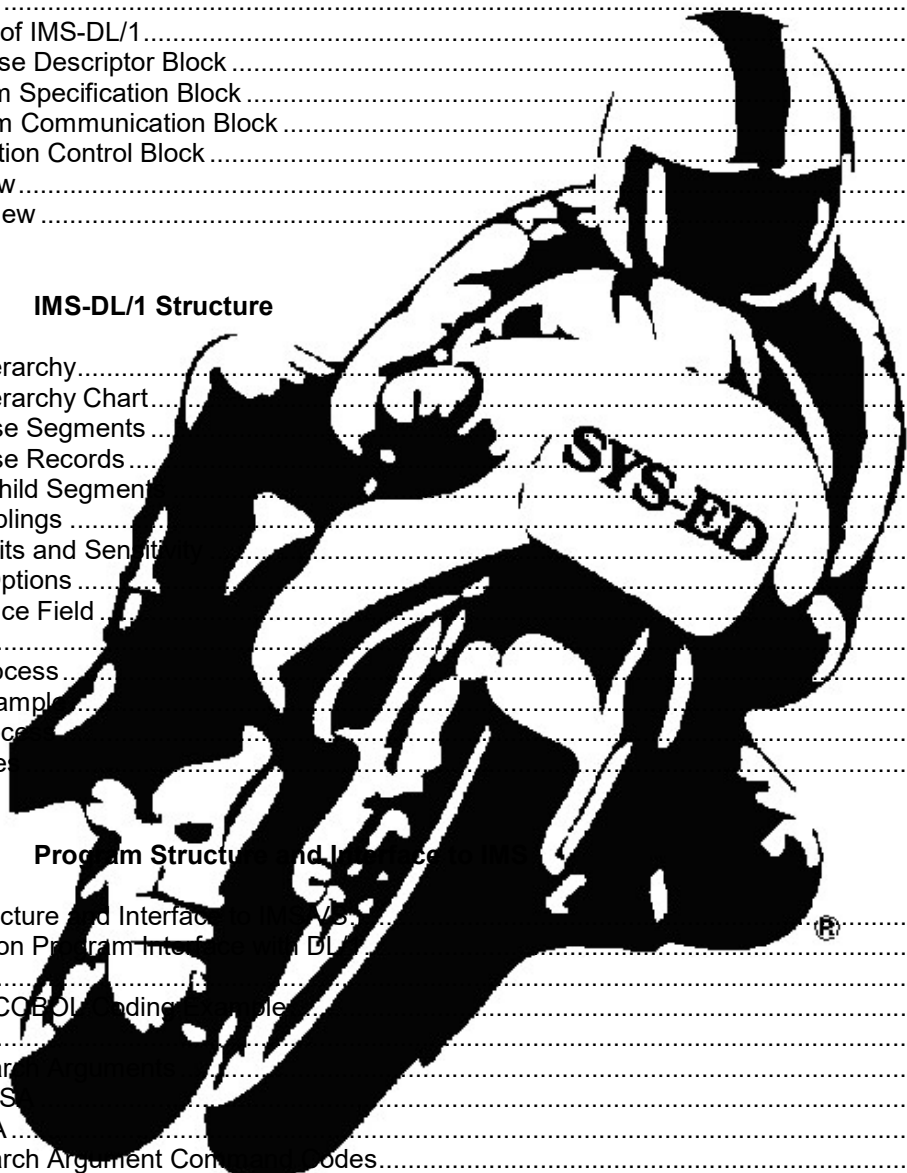

Status Codes Returned After Database Calls ..... 10

DL/1 COBOL Program Structure ..... 11

JCL Examples ..... 12

DL/1 COBOL Compile and Link JCL Example ..... 12

Execution JCL ..... 13

**Chapter 4: Database Retrieval Calls**

Retrieving Segments from a DL/1 Database..... 1

The GET-UNIQUE: GUbb Call..... 2

The GET-HOLD-UNIQUE: GHUb Call..... 3

Status Codes Returned After a GET-UNIQUE Call ..... 3

GET-UNIQUE Call Examples..... 4

Indented Hierarchy Chart ..... 5

Programming Example: An Unqualified GET-UNIQUE Call ..... 6

Programming Example: A Qualified GET-UNIQUE Call ..... 7

GET-NEXT: GNbb Calls..... 9

The GET-NEXT: GNbb Call ..... 9

The GET-HOLD-NEXT: GHNb Call ..... 10

Status Codes Returned After GNbb or GHNb Call ..... 10

Programming Example: An Unqualified GET-NEXT Call..... 11

Programming Example: The GET-NEXT Call..... 13

GET-NEXT-WITHIN-PARENT: GNP Calls ..... 14

The GET-NEXT-WITHIN-PARENT: GNP Call..... 14

The GET-HOLD-NEXT-PARENT: GHNP Call..... 14

Status Codes Returned After a GHNP Call..... 15

Programming Example: The GET-NEXT-WITHIN-PARENT Call..... 16

Processing Options for Retrieval ..... 20

Position After Retrieval Call ..... 20

PCB MASK Value After a Successful Retrieval Call ..... 21

PCB MASK Value After an Unsuccessful Retrieval Call ..... 22

**Chapter 5: Database Manipulation Calls**

The DELETE: DLETC Call..... 1

DELETE CALL Formats..... 1

Status Code Returned After a DLETC Call..... 1

GET-HOLD-UNIQUE Delete Sequence..... 2

Programming Example: Deleting a Database Record..... 3

Programming Example: Deleting a Segment..... 6

Database After Deleting a Segment..... 7

Programming Example: Deleting a Segment..... 8

Position After a Delete Call..... 10

The REPLACE: REPL Call..... 11

Status Codes Returned After a REPL Call..... 11

Position After a Replace Call..... 11

GET-HOLD-UNIQUE Sequence..... 12

Programming Example: Replacing a Segment..... 13

Programming Example: Replacing a CUST-INFO Segment..... 15

The INSERT: ISRT Call..... 17

INSERT Call Formats..... 17

Status Codes Returned After an INSERT Call..... 17

Processing Options for INSERT Call for the Load ..... 18

Loading the Database ..... 19

Single Step Load ..... 20

Multiple Step Load..... 21

Programming Example: 1-Step Load/First Step in a Multiple Step Load ..... 24

**Chapter 6: Advanced Techniques**

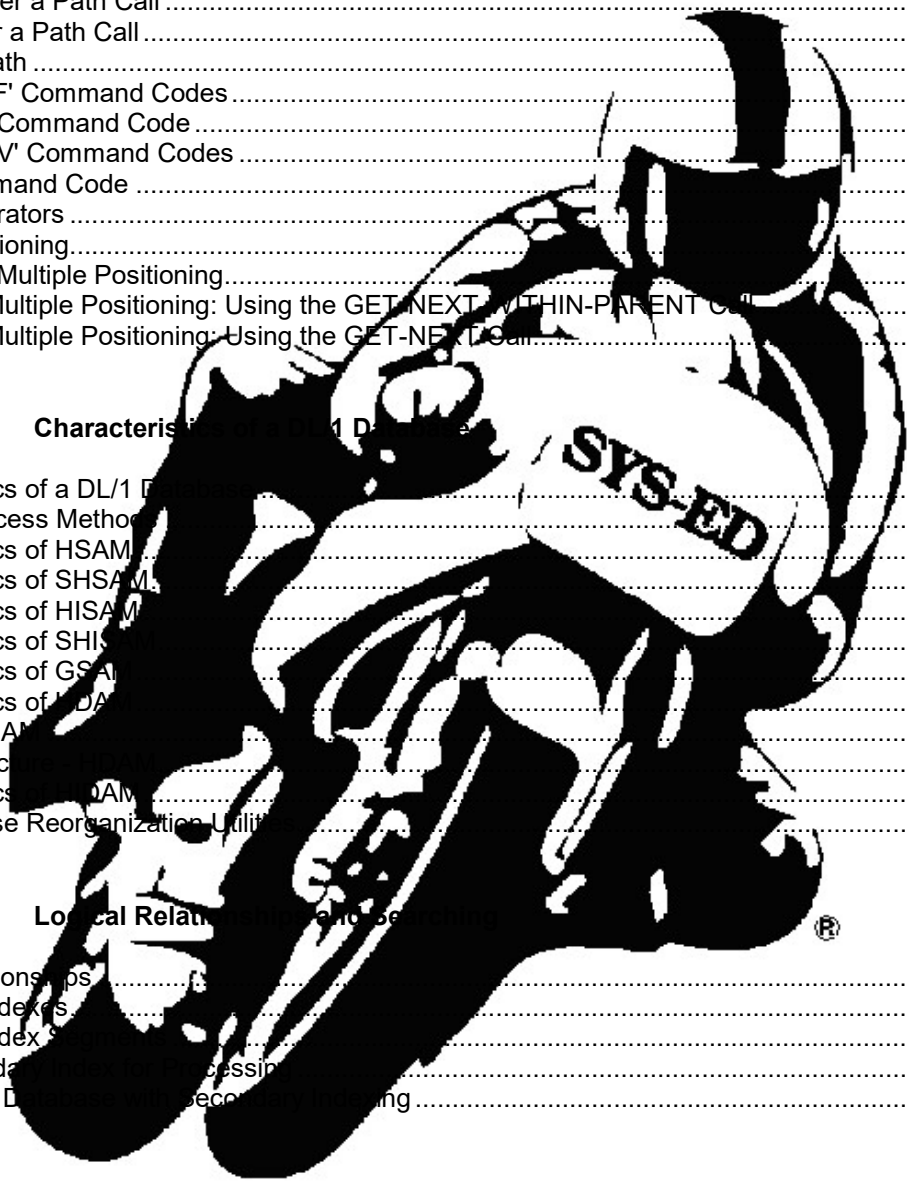

Command Codes .....	1
The `C' Command Code .....	1
The `D' and `N' Command Codes .....	2
Retrieving a Path .....	3
Replacing After a Path Call .....	3
Deleting After a Path Call .....	4
Inserting a Path .....	4
The `L' and `F' Command Codes .....	5
The `-(Null) Command Code .....	5
The `U' and `V' Command Codes .....	6
The `P' Command Code .....	6
Boolean Operators .....	7
Multiple Positioning .....	8
Examples of Multiple Positioning .....	9
Example of Multiple Positioning: Using the GET-NEXT-WITHIN-PARENT Call .....	10
Example of Multiple Positioning: Using the GET-NEXT Call .....	11

**Chapter 7: Characteristics of DL/1 Database Access Methods**

Characteristics of a DL/1 Database Access Method .....	1
Database Access Methods .....	2
Characteristics of HSAM .....	3
Characteristics of SHSAM .....	4
Characteristics of HISAM .....	5
Characteristics of SHISAM .....	6
Characteristics of GSAM .....	7
Characteristics of HDAM .....	8
Pointers - HDAM .....	9
Physical Structure .....	10
Characteristics of HSAM .....	10
DL/1 Database Reorganization Utility .....	12

**Chapter 8: Logical Relationships and Indexing**

Logical Relationships .....	1
Secondary Indexes .....	2
Secondary Index Structure .....	3
Using Secondary Indexes .....	7
Processing a Database with Secondary Indexing .....	8

**Chapter 9: System Service Calls**

System Service Calls ..... 1  
 CHKP/CHECKPOINT ..... 1  
 Symbolic/Extended CHKP Call Format ..... 3  
 XRST/RESTART ..... 4  
 XRST CALL Format ..... 5  
 Programming Example: The CHKP/XRSTCall Sequence ..... 6  
 The DL/1 Log ..... 8  
 Log Call Format ..... 9  
 STAT: STATISTICS ..... 10  
 Statistic Types ..... 11

**Chapter 10: DL/1 Debugging Aids**

DFSDDLTO: DL/1 Test Program ..... 1  
 Status Statement Format ..... 1  
 Comment Statement Format ..... 4  
 Call Statement Format ..... 4  
 PCB Compare Statement Format ..... 6  
 User I/O Area Compare Statement Format ..... 7  
 Coding Examples ..... 8  
 Database Load Example ..... 8  
 Database List Example ..... 9  
 Database Update Example ..... 10  
 Get Statistics Example ..... 11  
 Log Record Example ..... 11  
 JCL for Executing the DFSDDLTO Program ..... 12  
 DL/1 Trace ..... 13  
 Trace Control Statement ..... 13  
 JCL for the DL/1 Trace ..... 15  
 JCL Requirements ..... 15
