

Chapter 1: Getting Started

Message Queuing	1
Purpose and Functionality	1
Queuing	2
Message	2
Message Descriptor	2
Message Queue and Queue Manager	3
Cluster	4
Shared Queue, Queue-sharing Group, and Intra-group Queuing	5
WebSphere MQ Client	5
Applications: Message Queuing	6
No Direct Connections Among Programs	6
Time-independent Communication	7
Small Self-contained Programs	7
Event-driven Processing	7
Message Priority	8
Security	8
Data Integrity	8
Recovery Support	8
Message Queuing - Benefits	9
WebSphere MQ Objects	10
Messages: Design	11
Messages: Discarded	11
Messages: Waiting	12
Triggering - WebSphere MQ Application Program	12
WebSphere MQ Reports	13
Application Programming	14
WebSphere MQ Classes	14
Call Interface	15
MQ Java Library	16
WebSphere M	17

Chapter 2: Messages

WebSphere MQ Messages	1
Operating System Platforms	1
Message Types	2
Datagram	2
Request Message	3
Reply Message	3
Report Message	4
Format: Control Information and	5
Format of Message Control Information	5
Message Data	5
Application Data Conversion	7
Conversion - Sending Queue Manager	7
Conversion - Receiving Queue Manager	7
Message Priorities	8
Message Persistence	9
Message Persistence - Performance	9
Messages - Delivery Failure	9

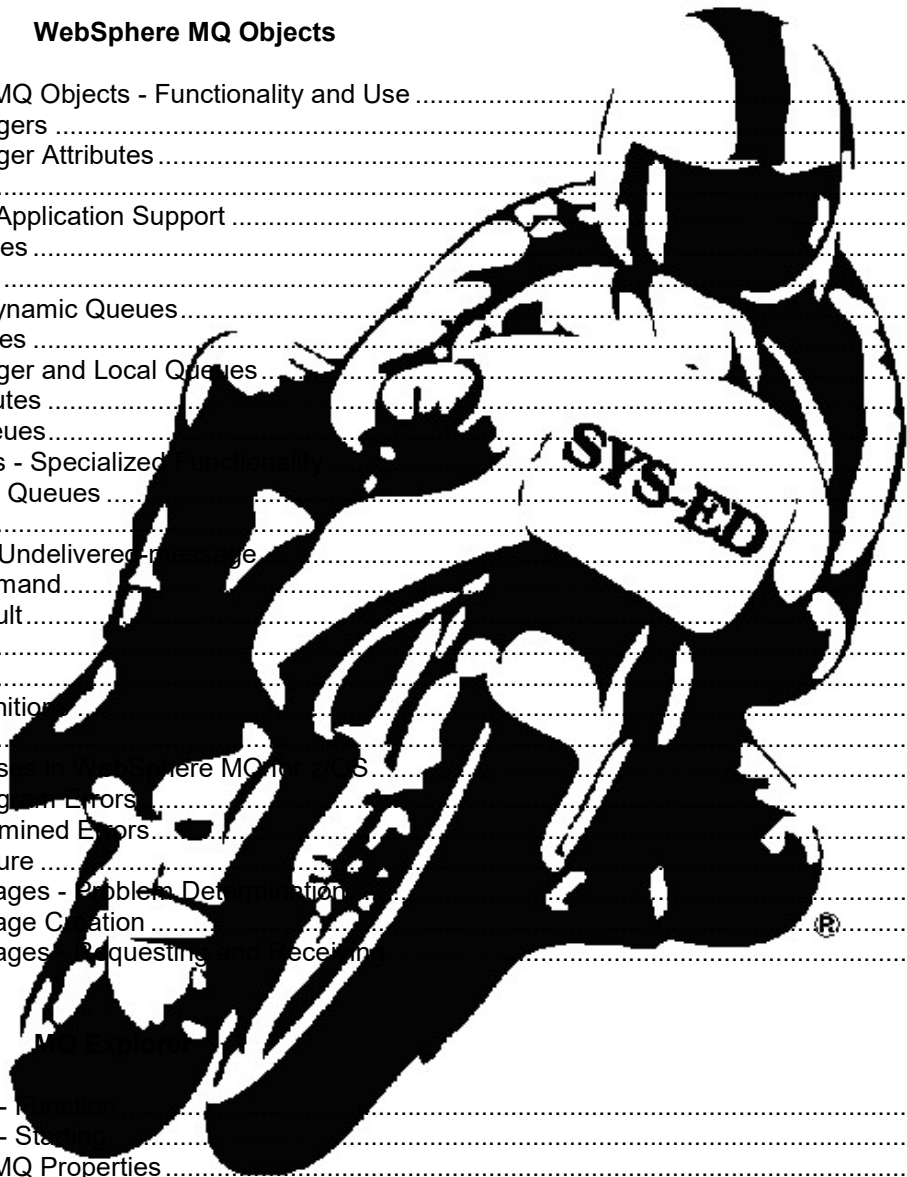

Messages - Backing Out 10
 Reply-To Queue and Queue Manager 10
 Message Context Information 11
 Identity Context Information 11
 Origin Context Information 12

Chapter 3: WebSphere MQ Objects

WebSphere MQ Objects - Functionality and Use 1
 Queue Managers 2
 Queue Manager Attributes 2
 Queues 4
 Queues and Application Support 4
 Shared Queues 5
 Alias Queues 5
 Model and Dynamic Queues 5
 Cluster Queues 5
 Queue Manager and Local Queues 6
 Queue Attributes 6
 Dynamic Queues 7
 Local Queues - Specialized 8
 Transmission Queues 8
 Initiation 8
 Dead-letter - Undelivered message 8
 System Command 9
 System Default 9
 Channel 9
 Event 9
 Process Definition 10
 Channels 10
 Storage Class 10
 Handling Program Errors 11
 Locally Determined Errors 11
 MQI Call Failure 12
 Report Messages - Problem Detection 13
 Report Message Creation 13
 Report Messages - Requesting Reception 14

Chapter 4:

MQ Explorer - 1
 MQ Explorer - Start 2
 WebSphere MQ Properties 3
 Queue Manager - Creation 4
 Data and Log Values 5
 Configuration Options 6
 Listener Option 7
 MQ Explorer Option 8
 MQ Explorer - Example 9
 Local Queue - Creation 10

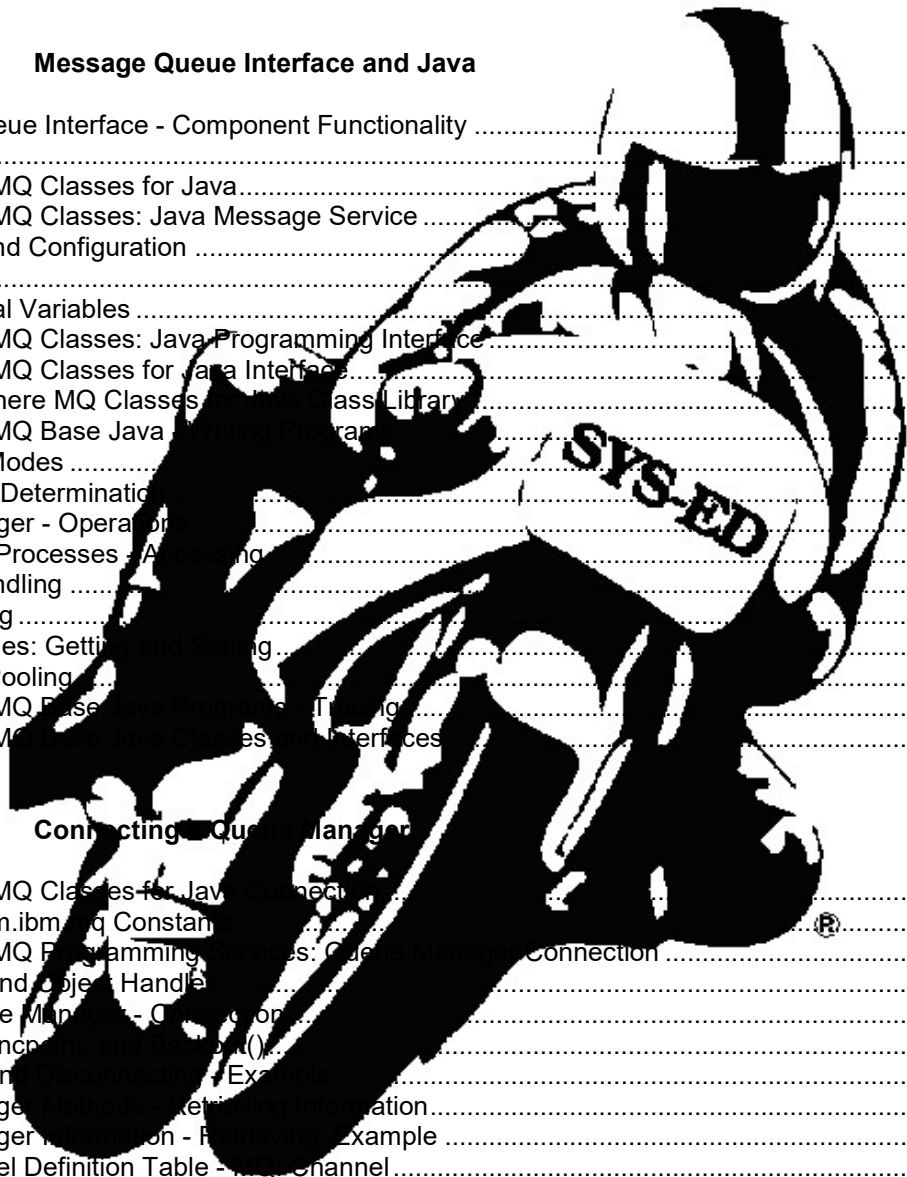

Message - Putting on the Queue 12
 Message - Confirm Being Sent 13
 Messages - Clearing 15
 MQSC Commands 16
 MQSC Commands - Rules 16
 MQSC Commands - Commonly Used 17

Chapter 5: Message Queue Interface and Java

Message Queue Interface - Component Functionality 1
 MQI Calls 1
 WebSphere MQ Classes for Java 2
 WebSphere MQ Classes: Java Message Service 3
 Installation and Configuration 4
 MQ Libraries 4
 Environmental Variables 4
 WebSphere MQ Classes: Java Programming Interface 5
 WebSphere MQ Classes for Java Interface 6
 Java WebSphere MQ Classes 6
 WebSphere MQ Base Java 7
 Connection Modes 7
 Connection - Determination 8
 Queue Manager - Operation 9
 Queues and Processes - Attaching 9
 Message Handling 10
 Error Handling 11
 Attribute Values: Getting 12
 Connection Pooling 13
 WebSphere MQ Base Java 14
 WebSphere MQ Base Java 15

Chapter 6: Connecting to Queue Manager

WebSphere MQ Classes for Java 1
 Package: com.ibm.mq 1
 WebSphere MQ Programming Classes: Queue 2
 Connection and Object Handle 3
 Default Queue Manager - Connection 3
 Commit(), Synchronise 3
 Connecting and 4
 Queue Manager 5
 Queue Manager 6
 Client Channel Definition Table - 8
 Client Channel Definition Table - Connection: Example 9

Chapter 7: Putting a Message

Putting Out a Message.....	1
MQMessage - writeXXX methods.....	2
Put Message Options.....	3
Putting Out a Message - Example.....	5
Put a Message - messageId and correlationId.....	7
Get a Message - messageId and correlationId.....	8
Put/Get with Message Id - Example.....	9
Message Groups.....	12
Message Group Hierarchy - Group.....	12
Message Group Hierarchy - Logical Message.....	13
Message Group Hierarchy - Segment.....	13
Messages on Queues - Physical or Logical Ordering.....	14
GroupId.....	14
Message Groups and Segments.....	15
Group Put Program - Example.....	15
Queue - Getting a Specific Message.....	18
Messages and Correlation Identifiers.....	18
Group Message - Get Message.....	20
Group Message Information.....	21
Get Group Messages - Example.....	22
Identity Context Information.....	26
All Context Information - Example.....	27
Identity Context - Setting.....	27
All Context - Setting.....	27

Chapter 8: Browsing Messages

Messages - Retrieving from a Queue.....	1
MQQueueManager - browse methods.....	2
Queue Creation - accessQueueOptions.....	3
Queue - Opening - Options.....	4
MQMessage Class.....	5
readStringOfByteLength Method.....	6
Browse Queue: Getting the First Message - Example.....	8
Browsing All Messages in the Queue.....	10
Browsing All Messages - Example.....	11
MQMD Structure, Message and Correlation Identifiers.....	13
Specific Message Retrieval from a Queue.....	13
Queue Attributes.....	13
Messages Larger than 64K.....	14
Multi- and Cross-Platform Data.....	15
Application Data Conversion.....	15
EBCDIC Newline Characters Conversion.....	15
Messages in a Queue.....	16
FIFO - First in, First out.....	16
FIFO - Prioritized Messages.....	16
Uncommitted Messages.....	16
Browsed Message - Removing.....	17
Browsing Messages in Logical Order.....	17

Chapter 9: Committing and Backing Out Units of Work

Unit of Work - Messages and Queues 1
Syncpoint and Unit of Work 2
Sync Program 3
Backout Method 7
Commit Method 8

Chapter 10: Triggers

Queue Manager and Triggers Events 1
Trigger-monitor Application - Processing the Initiation Queue 2
Triggering Components and Interaction 2
Trigger Monitor 4
Triggering - Prerequisites 4
Trigger Events - Controlling: Attributes and Application Queue 6
MQTM Structure - Trigger Message Format 7
MQTMC2 Structure 8
Trigger Program 9
