

**Chapter 1: Getting Started**

SQL Server 2008 Database Engine .....	1
Administration and Management Tools .....	2
Replication .....	3
Mirroring .....	4
Full Text Search .....	5
SQL Server Integration Services .....	6
SQL Server Analysis Services .....	7
SQL Server Reporting Services .....	8
SQL Server 2008 Editions .....	9

**Chapter 2: Installation**

Preparation .....	1
Before Running SQL Server 2008 Setup .....	1
Hardware and Software Requirements .....	2
Hardware Requirements .....	2
Operating System Requirements .....	3
Internet Requirements .....	4
Network Software Requirements .....	4
SQL Server 2008 Components .....	5
Installing SQL Server on a Database Server .....	5
Using SQL Server with Client/Server Applications .....	6
Using SQL Server with an Internet Server .....	6
Other SQL Server Components .....	6
Setting up Windows Services Accounts .....	7
Local System Account .....	7
Domain User Account .....	8
Requirements for Domain User Account .....	9
Changing User Accounts .....	9
File Paths for SQL Server 2008 .....	10
SQL Server Program File Location .....	10
SQL Server Data File Location .....	10
Specifying File Paths .....	11
Default Instance File Path for Program and Data Files .....	11
Named Instance File Path for Program and Data Files .....	11
Installation Steps .....	12
Computer Name .....	12
Installation Selection .....	13
User Information .....	14
Installation Definition .....	14
Instance Name .....	16
Instance Naming Rules .....	17
Setup Type: Typical, Minimum, or Custom .....	17
Components for Each Installation Type .....	18
Advanced Installation Options .....	20

Statement Permissions .....	21
Implied Permissions .....	22
Granting Permissions .....	23
Denying Permissions .....	24
Revoking Permissions .....	25

**Chapter 5: High Availability**

Virtual Servers .....	1
New Features .....	2
Hardware Factors .....	3
Microsoft Clustering Services .....	4
SQL Clustering .....	5
Data Replication .....	6
Log Shipping .....	7
Database Mirroring .....	8

**Chapter 6: Importing/Exporting Data**

Import/Export Tools .....	1
Choosing a Tool .....	1
Capabilities of Different Options .....	2
Preparing Data for Import/Export .....	3
bcp Utility .....	4
Using BULK INSERT .....	4
Trigger Execution .....	5
Using a Data File with Fields in a Different Order .....	6
Copying Data .....	8
Copying Data Between Servers .....	8
Copying Data from a Data File to SQL Server .....	8
Copying Data from a Query to a Data File .....	10
Copying Data to/from a Temporary Table .....	10
Copying Data to/from a View .....	11
Copying Data Between Different Collations .....	11
Column-level Collations .....	12
Bulk Copy Performance Consideration .....	14
The Query Processor .....	14
Logged and Minimally Logged Bulk Copy Operations .....	14
Parallel Data Loads .....	15
Batch Switches .....	15
Ordered Data Files .....	16

**Chapter 3: Administrative Tasks**

Starting, Pausing, and Stopping SQL Server .....	1
SQL Server Service .....	1
SQL Server Service Manager .....	1
SQLServerAgent Service .....	2
Polling Interval .....	3
SQL Server Enterprise Manager .....	3
SQL Server Service Manager .....	4
Starting SQL Server Automatically .....	5
Running SQL Server .....	6
Running SQL Server on a Network .....	7
Running SQL Server without a Network .....	8
Pausing and Resuming SQL Server .....	9
Stopping SQL Server .....	10
Broadcasting a Shutdown Message .....	11
Client Installation and Configuration .....	12
Database Files .....	13
Primary and Secondary Files .....	14
Filegroups .....	15
Partitions .....	16
Create database using SSMS .....	17
Service Broker Constructs .....	18
Defining Messages .....	19
Setting Up Contracts for Communications .....	20
Send and Receive Messages .....	21

**Chapter 4: Managing Security**

Security Architecture .....	1
Planning Security .....	2
Single Person Security .....	2
Small Company Security .....	3
Corporate Environment Security .....	4
Security Levels .....	5
Authentication Modes .....	5
Windows Authentication .....	5
SQL Server Authentication .....	6
Creating Security Accounts .....	6
Managing Principles .....	8
Managing Securables .....	9
Managing Logins .....	10
Managing Roles .....	11
Security Rules .....	12
Adding a Windows User or Group .....	13
Users .....	14
Local and Global Groups .....	15
Granting a Windows User or Group Access to a Database .....	16
Using Store Procedure sp_grantdbaccess .....	16
Using the Enterprise Manager .....	17-18
Managing Permissions .....	19
Object Permissions .....	20

**Chapter 7: Backing Up and Restoring Databases**

Creating a Backup with SSMS .....	1
Creating a Backup with T-SQL .....	2
Transaction Log Backup with SSMS .....	3
Transaction log backup with T-SQL .....	4
Full Database Backups .....	5
Differential Backups .....	6
Partial Backups .....	7
Filegroup Backups .....	8
Compressed Backup .....	9
System Database Backup .....	10
Restoring using SSMS .....	11
Restoring using T-SQL .....	12
Restoring a Snapshot .....	13
Restoring a Transaction Log .....	14
Restoring to a Point of Failure .....	15
Restoring to a Point of Time .....	16
Online Restores .....	17
Planning for Disaster Recovery .....	18
Backup Devices .....	19

**Chapter 8: Server Scheduling and Mail**

Configuring SQL Server Agent .....	1
SQL Server Startup Account .....	2
SQL Server Agent Proxy Account .....	3
SQL Server Agent Error Log .....	4
Managing Operators .....	5
Managing Jobs .....	6
Managing Alerts .....	7
Scripting Jobs and Alerts .....	8
Multi-server Job Management .....	9
Event Forwarding .....	10
Mail profiles and Accounts .....	11
System Wide Mail Settings .....	12
Sending and Receiving Mail .....	13
SQL Server Agent Mail .....	14

**Chapter 9 Administering with PowerShell**

PowerShell Functionality .....	1
SQL Server Management objects .....	2
WMI .....	3
PowerShell Console .....	4
Execution Policy .....	5
Scripting Syntax and Commands .....	6
Comment .....	7
Variables .....	8
Escape Characters .....	9
Strings and String Manipulation .....	10
Conditional Statements .....	11

Arithmetic Statements ..... 12  
 Functions ..... 13  
 PowerShell Cmdlets ..... 14  
 SQL Server PowerShell ..... 15  
 SQL Provider ..... 16  
 SQL Cmdlets ..... 17

**Chapter 10: Managing Clients**

Configuring Client Net-Libraries ..... 1  
 Viewing Network Library Information ..... 1  
 Changing Default Configurations ..... 1-2  
 Configuring a Multiprotocol Alias ..... 3

**Chapter 11: Functions and Language Elements**

Built-in Functions ..... 1  
 Mathematical Functions ..... 1-2  
 String Functions ..... 3  
 Date and Time Functions ..... 7  
 Dateparts Recognized by Microsoft SQL Server ..... 8  
 Flow Control ..... 9  
 BEGIN...END ..... 9  
 BREAK ..... 9  
 CONTINUE ..... 9  
 GOTO ..... 10  
 IF...ELSE ..... 10  
 RETURN ..... 11  
 WAITFOR ..... 12  
 WHILE ..... 13

**Chapter 11: Stored Procedures and Triggers**

Purpose and Features ..... 1  
 Batches ..... 1  
 Business Rules with Triggers ..... 1  
 Triggers Compared to Constraints ..... 2  
 Stored Procedure ..... 3  
 Storing and Executing the Programs ..... 3  
 Benefits of Using Stored Procedures ..... 4  
 Ad-Hoc Query versus Stored Procedure Execution ..... 5  
 Control-of-Flow Language ..... 6  
 BEGIN...END ..... 7  
 WHILE and BREAK...CONTINUE ..... 7  
 Local Variables: DECLARE Keyword ..... 8  
 Global Variables ..... 9  
 GOTO ..... 11  
 RETURN ..... 11  
 WAITFOR ..... 11

PRINT and RAISEERROR ..... 12  
 Stored and System Procedures ..... 13  
 Creating and Executing Procedures ..... 14  
 Triggers ..... 16  
 Defining a Trigger ..... 16  
 SQL Statements Not Allowed in Triggers ..... 17  
 Removing a Trigger: DROP TRIGGER ..... 18  
 Restrictions ..... 18
