

**Chapter 1: Getting Started**

Purpose and Features of VBScript.....	1
Client Side Scripting.....	1
Server Side Scripting.....	2
Windows Script.....	2
VBScript in Applications and Browsers.....	3
Adding VBScript to a HTML Document.....	4
<script> Element.....	4
Location of <script> Block.....	5
Event Handler.....	5
VBScript Page.....	6
Inline Coding.....	7
Programming Conventions.....	8
Adding Comments.....	9
Case Sensitivity.....	9
End of Statement and Continuation.....	10
Formatting the Code.....	11
White Space.....	11
Guidelines.....	11
Writing Reusable Scripts.....	13
Necessary Tools.....	14

**Chapter 2: Console I/O**

MsgBox Function.....	1
How Many/What Buttons? .....	2
Which Icon? .....	2
Default Button.....	2
Modal Type .....	3
Return Values.....	4
InputBox Function.....	5-6
Displaying Information from Client Scripts.....	7
document.Write Method.....	7
document.WriteLine Method.....	7
Displaying Information in an HTML Control.....	8
innerText Property.....	8
Formatting the Displayed Text.....	9
Displaying Reserved Characters.....	9
Status Bar .....	10

**Chapter 3: Variables, Arrays, and Constants**

Variables .....	1
Types of Variables.....	1
Declaring Variables.....	1
Naming Variables.....	2
Scope of Variables .....	2

**Chapter 5: Control Structures**

Controlling Program Execution.....	1
If...Then...Else .....	1-4
Select...Case .....	5-6
Loops for Repeating Code.....	7
Do Loops.....	8
While...Wend .....	11
For...Next .....	12
For Each...Next .....	14-15
With Statement.....	16
Exit Statement.....	17

**Chapter 6: Modular Programming**

VBScript Procedures .....	1
Sub Procedures.....	1
Function Procedures.....	2
Sub Statement.....	3
Argument List.....	3
Scope of Sub Procedures.....	4
Exiting a Sub Procedure.....	4
Variables in a Sub Procedure.....	4
Function Statement.....	5
Scope of Function Procedures.....	6
Exiting a Function Procedure.....	6
Return Value.....	6
Variables in a Function.....	7
Call Statement.....	8
Recursion.....	9
Useful String Related Functions.....	10
InStr() Function.....	10
Left() Function.....	11
Right() Function.....	12
Mid() Function .....	12
Len() Function .....	13

**Chapter 7: VBScript**

VBScript Object Model .....	1
Properties, Methods, and Events .....	2
Properties.....	2
Methods.....	2
Event.....	3
Event Model.....	4
Life Cycle of an Event.....	4
Handling Events .....	5
Events.....	6
Keyboard Events.....	6
Mouse Events.....	7
Focus Events.....	8
Selection Events.....	9

Lifetime of Variables .....	2
Assigning Values to Variables.....	3
Arrays.....	4
Array Declaration.....	4
Assigning Data to Array Elements.....	5
Accessing Array Elements.....	5
Multidimensional Arrays.....	6
Dynamic Arrays.....	7
Option Explicit Statement.....	8
Dim Statement.....	9
ReDim Statement.....	10
Preserve Option.....	11
Initial Values.....	11
Private Statement.....	12
Public Statement.....	13
Data Types .....	14
Variant Subtypes .....	14
Types and Ranges .....	15
Variable Naming Conventions .....	16
Constants .....	17
Creating Constants .....	17
Naming a Constant .....	18
Opening and Closing Brackets .....	19

**Chapter 4: Operators**

Types of Operators .....	1
Operator Precedence .....	1
Arithmetic Operators .....	2
Comparison Operators .....	3
Concatenation Operators .....	4
+ for Concatenation .....	4
& Operator for Concatenation .....	4
Logical Operators .....	5
Bitwise Comparison .....	6
Bitwise And .....	6
Bitwise Or .....	6
Bitwise Xor .....	7
Bitwise Not .....	7
Determining Data Type .....	8
IsArray() Function .....	8
IsDate() Function .....	9
IsEmpty() Function .....	9
IsNull() Function .....	10
IsNumeric() Function .....	11
IsObject() Function .....	11
TypeName() Function .....	12-13
VarType() Function .....	14

Load and Readystate Events .....	10
HTML Forms .....	11
Processing Form Inputs .....	12-13
Form Collection .....	14
Verifying Form Input .....	15

**Chapter 8: Document Object Model**

W3C Document Object Model .....	1
Microsoft DHTML Object Model .....	1
Hierarchy of Elements .....	2
W3C DOM Specifications .....	3-4
W3C DOM Implementation .....	5
Properties .....	5-10
Methods .....	11-12
Collections .....	13
HTML Document Object Model .....	14
Referencing HTML Objects .....	14
HTML Document Object Hierarchy .....	15

**Chapter 9: Date and Time**

VBScript Date and Time .....	1
Formats for Current Date and Time .....	1
Testing for a Valid Date .....	2
Obtaining Date/Time from Strings .....	3
CDate() Function .....	3
DateValue() Function .....	4
TimeValue() Function .....	5
Creating Date/Time from Numeric Values .....	6
DateSerial() Function .....	6
TimeSerial() Function .....	7
Obtaining System Date/Time .....	8
Date() Function .....	8
Time() Function .....	8
Date/Time Arithmetic .....	9
DateAdd() Function .....	9
DateDiff() Function .....	10-12
DatePart() Function .....	13-14
Portions of Date .....	15
Day() Function .....	15
Month() Function .....	15
MonthName() Function .....	16
Weekday() Function .....	16-17
WeekdayName() Function .....	18
Year() Function .....	19
Portions of Time .....	20
Hour() Function .....	20
Minute() Function .....	20
Second() Function .....	21
