

Chapter 1: Introduction

Installation and Configuration.....	1
IP Address and Text Name.....	2
Site Administration.....	3
Administration.....	4
Integrated Request Pipeline.....	5
Configurability.....	6
Componentization.....	7
Security.....	8
IIS Administration Tools.....	9
Diagnostics.....	10
Compatibility.....	11
Server Core.....	12
Virtualization.....	13
Failover Clustering.....	14
WCF.....	15
BitLocker Encryption.....	16
Network Access Protection.....	17

Chapter 2: IIS Installation

Clean Installation.....	1
With Windows Server 2008 Installation.....	2
From DVD to an Existing Server.....	3
Upgrade Installation.....	4
In-Place Upgrade.....	5
Migration Upgrade.....	6
Installing New Features.....	7
Configuring and Testing New Features.....	8
Automated Installation and Configuration.....	9
Server Core Command-line Installation.....	10
Pkgmgr.exe.....	11
Unattended Installations Using Pkgmgr.exe.....	12
Installation Using Windows Deployment Services.....	13
Hosting Service Recommendations.....	14
Directory Structure.....	15
Web Server Accounts and Application Pools.....	16
Configuring Shared Hosting with Managed Code.....	17
User Rights.....	18
Anonymous Authentication.....	19
Basic Authentication.....	20
Setting Up a Web Site.....	21
Setting Up a FTP Site.....	22
Adding Additional Sites.....	23

Configuring FTP 7 User Isolation.....	24
Configuring FTP 7 Host Name Support.....	25
Administering FTP 7 with Configuration Files.....	26

Chapter 5: Site Administration

Working with Application Pools.....	1
Creating Application Pools.....	2
Managing Settings.....	3
Assigning Applications and Sites to Application Pools.....	4
Specifying the .NET Framework Version.....	5
Specifying the Managed Pipeline Mode.....	6
Managing Active Application Pools.....	7
Application Pool Security.....	8
Application Pool Configuration Isolation.....	9
Application Pool SID Injection.....	10
Site Anonymous User.....	11
Noteworthy Advanced Settings.....	12
Bitness.....	13
CPU Limits.....	14
Processor Affinity.....	15
Application Pool Users.....	16
Network Service Account.....	17
Local Service Account.....	18
Custom User Account.....	19

Chapter 6: Active Web Server

Setting up an Active Web Server.....	1
Web Development.....	2
A Simple HTML Page.....	3
Creating an Active Server Page.....	4
Activating the Server.....	4
Programming Steps.....	5
Specifying a Default Scripting Language.....	5
Procedures and Functions.....	6
Inline Server Side Scripting and <SCRIPT> Tag.....	7
Inline Scripting.....	7
<SCRIPT> Tag.....	7
Server-side Include files.....	8-9
Active Server Pages Object Model.....	10-11
Request Object.....	12
Form Collection.....	13
QueryString Collection.....	14
Response Object.....	15-16
Application Object.....	17
Global.asa file.....	18
Session Object.....	19
Server Object.....	20

Chapter 3: IIS Manager

Appearance.....	1
Feature Scopes.....	2
Features View.....	3
Content View.....	4
Feature Delegation.....	5
Configuration File Hierarchy.....	6
Configuration Levels.....	7
Location Tags.....	8
Configuration File Structure.....	9
Configuration Schema.....	10
Locking and Unlocking Sections.....	11
Using AppCmd.exe.....	12
Name Resolution.....	13
Intranet Name Resolution Systems.....	14
IP Address Assignment.....	15
Advantages of DHCP.....	16
Name Resolution Systems.....	17
Internet Name Resolution.....	18
Assigning Host Header Names, Addresses, and Ports to Web Sites.....	19
Multiple Names.....	20
Multiple IP Addresses.....	21
Multiple Port Numbers.....	22
Ensuring Unique Identity.....	23
Naming Web Sites.....	24

Chapter 4: Web and FTP Sites

Creating a Web Site Using IIS Manager.....	1
Creating a New Application Pool for Your Site.....	2
Creating a Web Site Using AppCmd.....	3
Creating a Web Site Using Microsoft.Web.Administration.....	4
Changes to the applicationHost.config File.....	5
Web and FTP Sites.....	6
Properties and Inheritance of Properties on Sites.....	7
Web Site Operators.....	8
Administering Sites Remotely.....	9
Starting and Stopping Sites.....	10
Adding Sites.....	11
Naming Web Sites.....	12
Supporting Host Header Names in Older Browsers.....	13
Redirecting the Browser.....	14
Creating Virtual Directories Using IIS Manager.....	15
Creating Virtual Directories Using AppCmd.....	16
Adding Virtual Directories Using Microsoft.Web.Administration.....	17
Removing Virtual Directories.....	18
Installing FTP 7.....	19
Creating a New FTP 7 Site.....	20
Adding an FTP 7 Site to an Existing Web Site.....	21
Configuring FTP 7 Security.....	22
Configuring FTP 7 over SSL.....	23

Chapter 7: Server Side Scripting

Basics of Server-Side JavaScript.....	1
Client Environment.....	1
Server Environment.....	1
What to Do Where?.....	2-3
Runtime Processing.....	4-6
The Server-Side Language.....	7
Usage.....	7
Environment.....	8
Classes and Objects.....	9-10
Embedding JavaScript in HTML.....	11
Using the SERVER Tag.....	11
Using backquote (`).....	12
Choosing a Technique.....	13
Constructing the HTML Page.....	14
Generating HTML.....	14
Flushing the Output Buffer.....	15
Changing to a New Client Request.....	16
Sending Values from Client to Server.....	17
Accessing Form Values.....	18
Client Side Processing.....	19
Encoding Information in a URL.....	20
Sending Values from Server to Client.....	21
Default Form Values and Hidden Form Elements.....	21
Direct Substitution.....	22
Using Cookies.....	23
