Chapter 1: Introduction

LAN Components 1
Network Software/Hardware Interaction 2
Network and Terminal Attachment Units 3
Cabling and Media Access Control 4
Interface Cards 6
Methods of Transmission 7
I/O: Input/Output 7
DMA: Direct Memory Access 8
Shared Memory 8
PC to NIC Buffering 9
Data Packets 10
Packet Sections 12
Data Transmission 13
Network Interface Card - Selection 15
Standardization and ISO 16
The Protocol Process 17
OSI Reference Model 18
TCP/IP and the OSI Protocol 19
TCP/IP Architecture 20
Access Protocols: Purpose and Function 23
The IEEE 802 Architectural Layers 24
Control Access Protocols 25

Chapter 2: Protocols

Polling 1
Slotted Access 2
Slotted Ring 3
Demand Access Protocols 4
Circuit Switching 4
Carrier Sense Multiple Access/Collision Detection 4
Collision Detection 5
Contention Protocols: CSMA/CD 6
General 6
Aloha 6
CSMA/CD Media Access Control Function 7
Physical Hardware Partitioning For Token-Passing Bus Network 8
Performance Comparisons 9
CSMA/CD 10
IEEE 802 Committee Standards 11
Protocol Stacks 12
LAN Standards: The State of the Market 13
Ethernet 14
Ethernet Intersystem Connectivity 15
Ethernet Cabling 16
Ethernet Packaging and Moving Data 17-19
TCP/IP for Multi Platform Networking 20
TCP/IP On-line 20

TCP/IP Gateway 21
TCP/IP: Internet Address 22
TCP/IP: Transmission Control Protocol 23
Autonegotiation 24
Spanning Trees 25
Tunnels 26

Chapter 3: Transmission Techniques and Cabling

Transmission Techniques 1
Broadband System 2-3
Broadband Tree and Branch Topology 4
Broadband Tree and Branch Topology Unity Principle 5
Broadband Standards 5
Digital Technology 6
Baseband System 7
Analog versus Digital: A Comparison 8
Which Transmission to Choose 8
Terrestrial and Free-space Media 9
Terrestrial Media: Twisted Pair 10
Terrestrial Media: Copper Wire 11
Terrestrial Media: Optical Fibers 12-13
Terrestrial Media: Fiber Optics 14
Centralized Premises Wiring Schemes 15-16
IEEE Baseband Cable Standards 17
Free-Space Media 18
Infrared 18
Microwave Radio 19
Summary: Baseband versus Broadband 20
LAN Topology 21
Choosing an Appropriate Topology 21
Cable Topologies 22
Star Topology 23
Star Considerations 24
Bus Topology 25
Bus Considerations 26
Tree Topology 27
Tree Considerations 27
Ring Topology 28
Ring Considerations 29
Star Wired Ring Topology 30
Physical Topology and Logical Path 31
SOHO VoIP and SOHO Wireless Access Point Design 32

Chapter 4: Windows and TCP/IP

Microsoft Networking Transport Protocols 1
Transport Selection Guidelines 1
Other Network Protocols 2
TCP/IP: Protocol of the Internet 3
Concurrent Multiple Protocols 4
Network Neighborhood Object: Properties 5-6
Configuring the TCP/IP Settings 7-8
IP Addresses 9-10
Subnets, Gateways, and Routers 11
Binary Masks 12
DNS: Domain Name System 13-14
DHCP 15
WINS 15-16
TCP/IP Utilities 17
ARP 17
IPCONFIG Utility 18
NBTSTAT Utility 19-20
PING Utility 21-22
ROUTE Utility 23
TRACERT Utility 24
Addressing 25
Routing 26
Multiplexing 27
Address Resolution 28
Routing Tables 29
Network Services 30

Chapter 5: Windows Active Directory Services

How Objects are Stored 1-2
Domain Model 3
Domain Trees 4
Forests 5
FSMO Flexible Single Master Operator 6
Domain Naming Context 7
Active Directory Schema 8
Site Topology 9
Replication 10
DNS Zones 11
Resource Records 12
Active Directory Integrated DNS 13
Read Only Domain Controllers 14
Group Policy 15
GPMC Group Policy Management Console 16
Delegation and Change Control 17
Password Policies 18
Designing Namespaces 19
Site Topology 20

Permissions and Auditing 21
Backup and Recovery 22
Active Directory Lightweight Directory Service 23
Scripting 24

Chapter 6: Windows Administration

Zones versus Domains 1
Resource Records 2
Primary and Secondary Nameservers 3
Understanding Operation Masters Role 4
Directory Replication 5
Group Policy 6
Deployment Considerations 7
Remote Desktop Protocol 8
Terminal Server 9
DHCP and Network Access Protection 10
Clustering 11

Chapter 7: Implementing TCP/IP: DHCP, WINS and DNS

TCP/IP: Purpose and Function 1
IP 1
TCP 2-3
DHCP Software Requirements 4
Benefits 4
DHCP Clients and Servers 4
Starting DHCP Manager 5
Starting and Stopping the DHCP Server Service 6
DHCP Scopes 7
Creating Scopes 7-8
Changing Scope Properties 9
Removing a Scope 10
Administering DHCP Clients 11
Managing Client Leases 11-12
Deleting a Client Lease 13
Managing Client Reservations 13-14
Changing the Reserved IP Address 15
Changing the Basic Information for a Reserved Client 15
DHCP Option Types 16
Assigning DHCP Configuration Options 16-17
Adding New Option Types 18
Deleting Option Types 19
Changing Option Values 20
Platform and Configuration 21-25
Adding Static Mappings 26-27
Viewing the WINS Database 28-29
Backing Up and Restoring the Database 30
DNS - Purpose and Function 31
Installing a DNS Server 32

Adding a Server to the DNS Manager List 33-35
Registering with the DNS Parent Domain 36
DNS Support in UNC Names 37
Working with Zones 38-41
Adding a New Host 42-43
Subzone 44-45
Forcing Data File Update on the DNS 46

Chapter 8: Debugging and Commands

TCP/IP Diagnostic Utilities 1
Troubleshooting IP Configuration 2
TCP Debugging 3
arp Command 4
finger Utility 5
ftp Utility 6
ftp Commands 7-8
hostname Utility 9
ipconfig Utility 10
nbtstat Utility 11
State of NetBIOS Connections 12
netstat Utility 13
ping Utility 14

Chapter 9: Performance Monitor

Purpose and Functions 1
Starting and Quitting 2
Organizing the Screen 2
Counter Organization 3-5
Performance Management 6
Applications 6
Memory Usage 6-7
Processor Activity 8
Disk Activity 8
Workload Balance 9
Tracking Disk Performance 10
Monitoring Network Activity 11
Server Throughput Statistics 11
Network Counters 12
Network Traffic 13
Using Performance Monitor with TCP/IP Services 13-14
Threshold Counters 15

Chapter 10: Protocol Formats and Architecture

TCP\IP Internet Protocol Suite 1
Ethernet Addressing 2-3
Ethernet Frame Format 4
Internet Addressing 5
Three Primary Classes of IP Addresses 6
Loopback Address 7
Special Address Conventions 8
Mapping Internet Addresses to Physical Addresses - ARP 9
ARP Protocol Format 10
Internet Protocol: Connectionless Datagram Delivery 11
Connectionless Delivery System 12
Internet Protocol 13
Datagram Format 14
TTL: Time to Live 15
Routing in an Internet 16
ICMP: Internet Protocol: Error and Control Messages 17
User Datagram Protocol 18
Format of UDP Messages 19
UDP Multiplexing, Demultiplexing, and Ports 20
Reserved and Available UDP Numbers 21
Stream Delivery 22
Reliable Delivery Service 23-25
Ports, Connections, and Endpoints 26

Chapter 11: Network Monitor

Purpose and Function 1
Network Frames 2-3
Categories of Frames 4
Broadcast Frames 4
Directed Frame 4
Implementing Network Monitor 5-6
Network Monitor Interface 7
Capturing Data with Network Monitor 8
Capture Window Frame 8-9
Viewing Captured Data 10
Summary Pane 10-12
Interpreting Frames in a Capture File 13
DHCP Frames 13
WINS Frames 14-17
File Session Frames 18-19
Logon Validation Frames 20-21
Optimizing Logon Validation 22-23
Exploring Browser Traffic 24-28
Analyzing Traffic Between Domain Controllers 29
Account Database Synchronization 29-32
Analyzing Trust Traffic 33-35
Traffic Generated Through Directory Replication 36-38
Check List - Summary 39
Traffic Summary by Service 40
