

Chapter 1: Getting Started

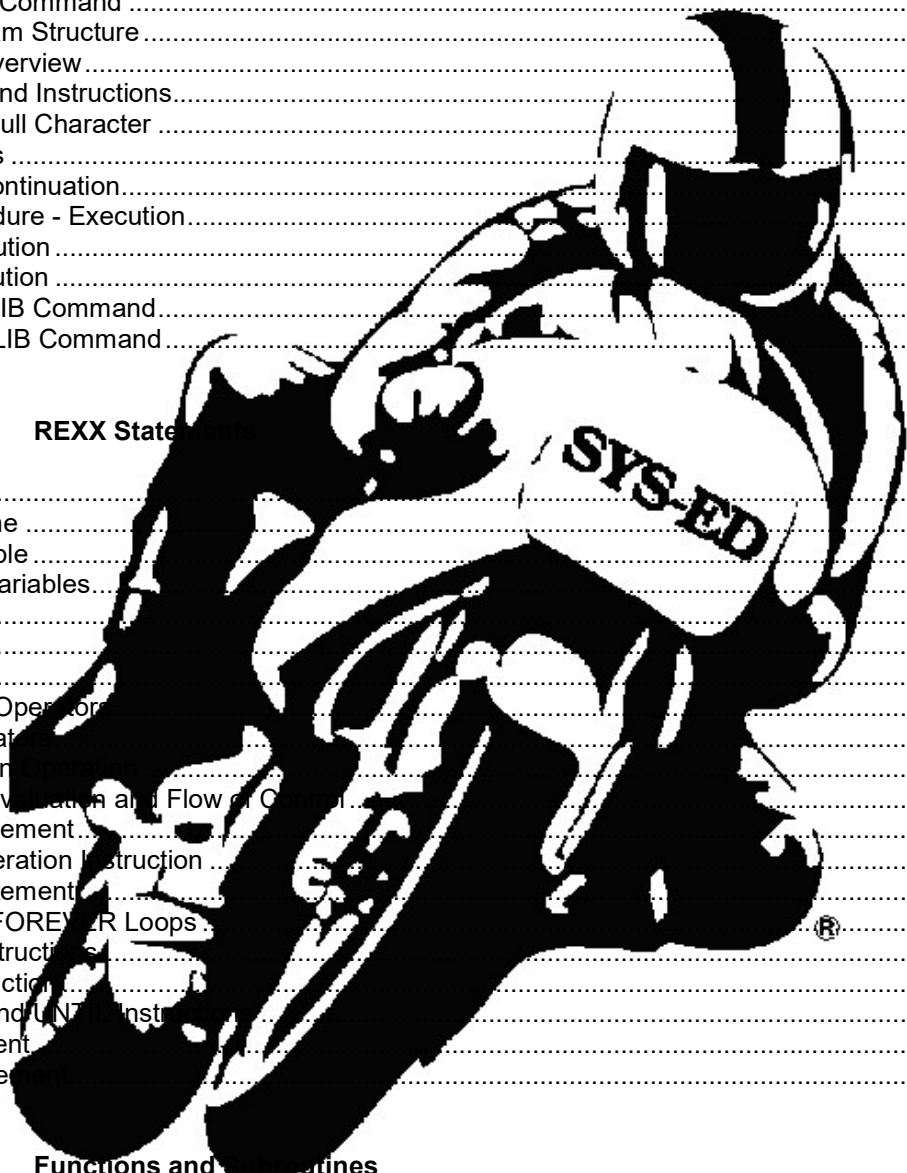

REXX: Restructured Extended Executor 1
REXX Language Featureset 2
REXX Language Data Model 2
REXX Program Storage - Sequential or Partitioned Dataset 4
TSO ALLOC Command 4
REXX Program Structure 5
Statement Overview 5
Statements and Instructions 6
Comment - Null Character 6
Literal Strings 7
Statement Continuation 7
REXX Procedure - Execution 8
Explicit Execution 8
Implicit Execution 9
TSO/E: ALTLIB Command 10
TSO/E: TSOLIB Command 11

Chapter 2: REXX Statements

Variables 1
Variable Name 1
Simple Variable 1
Compound Variables 2
Expressions 4
Constants 4
Operators 4
Comparison Operators 5
Logical Operators 7
Concatenation 8
Conditional Evaluation and Flow of Control 9
IF/THEN Statement 9
NOP: No Operation Instruction 10
SELECT Statement 11
DO and DO FOREVER Loops 13
ITERATE Instruction 16
LEAVE Instruction 17
DO WHILE and UNTIL Instructions 18
EXIT Statement 19
SIGNAL Statement 20

Chapter 3: Functions and Subroutines

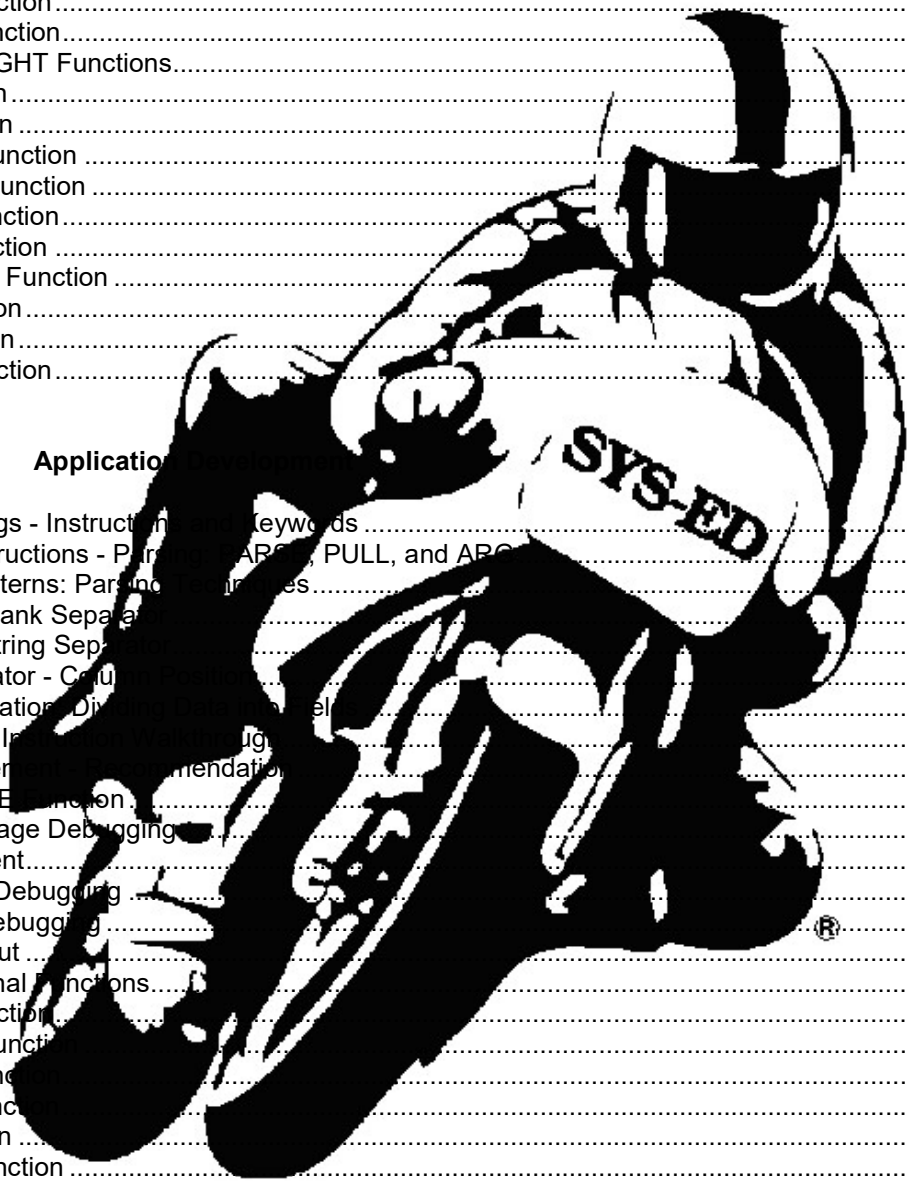

CALL and RETURN Statements 1
Function - Types 4
Coding Functions in a Program 4
Subroutines 5
Variable Sharing - Rules 5
Variable - Sharing Walkthrough 6

Built-in Functions.....	7
DATATYPE Function.....	8
FORMAT Function.....	10
TRUNC Function.....	11
SUBSTR Function.....	12
LENGTH Function.....	12
COPIES Function.....	13
CENTER Function.....	14
LEFT and RIGHT Functions.....	14
POS Function.....	16
FIND Function.....	17
OVERLAY Function.....	17
COMPARE Function.....	18
ABBREV Function.....	19
VERIFY Function.....	20
TRANSLATE Function.....	22
DATE Function.....	24
TIME Function.....	25
USERID Function.....	26

Chapter 4: Application

Parsing Strings - Instruction and Keywords.....	1
Keyword Instructions - PARS, ARG, PULL, and ARG.....	1
Template Patterns: Parsing Strings.....	3
Template - Blank Separators.....	3
Template - String Separators.....	4
String Separator - Cofu.....	5
Parsing Operations: Direct Level.....	7
PARSE VAR Instruction.....	7
PARSE Statement Recommendation.....	9
SOURCELINE Function.....	10
REXX Language Debugging.....	11
SAY Statement.....	11
Batch Trace Debugging.....	12
Interactive Debugging.....	13
TRACE Output.....	14
TSO/E External Functions.....	15
LISTDSI Function.....	15
OUTTRAP Function.....	17
SYSDSN Function.....	19
SYSVAR Function.....	20
MSG Function.....	21
MVSVAR Function.....	21
PROMPT Function.....	22

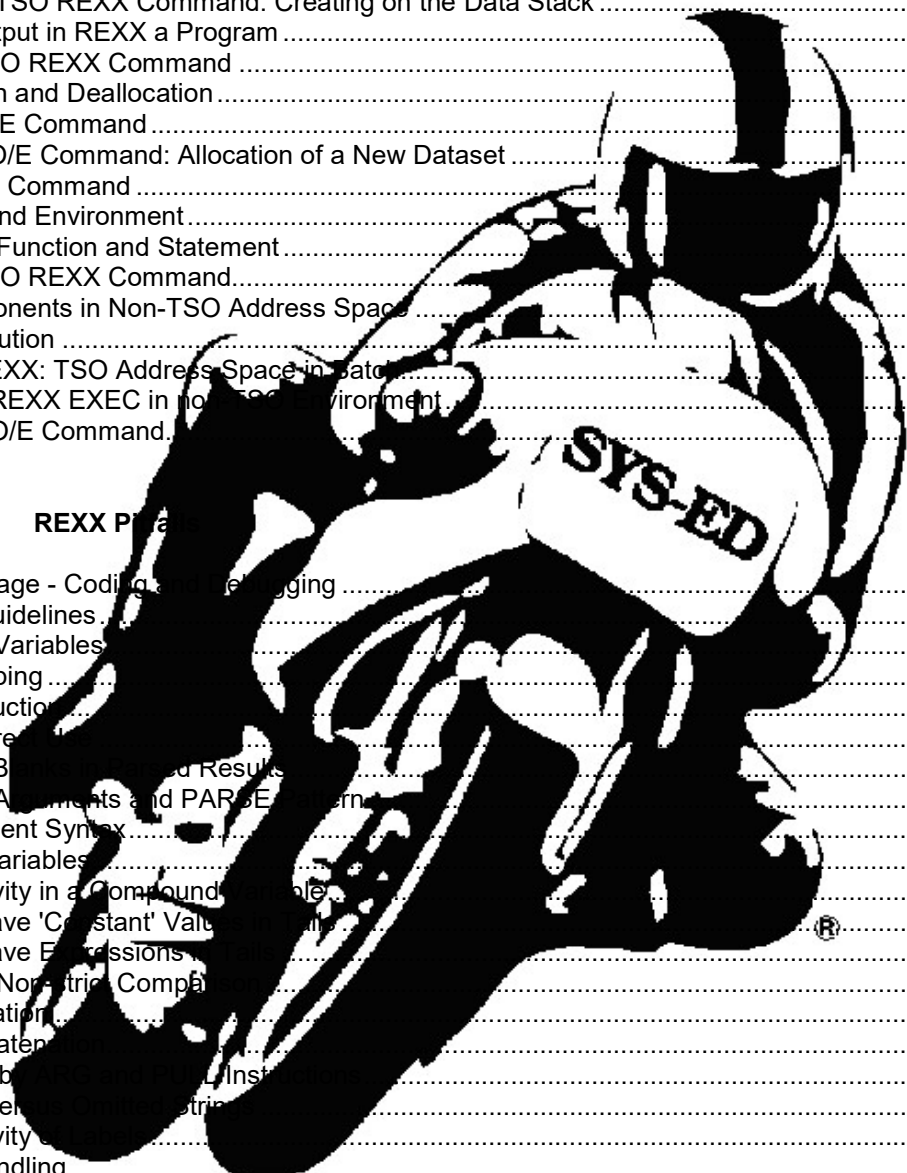

Chapter 5: Data Structures, Input/Output, and Host Environment

Data Stack and Queue 1
QUEUE Instruction 2
PUSH Instruction 3
PULL Instruction 4
MAKEBUF - TSO REXX Command: Creating on the Data Stack 5
I/O: Input/Output in REXX a Program 6
EXECIO - TSO REXX Command 6
File Allocation and Deallocation 10
ALLOC TSO/E Command 10
ALLOC - TSO/E Command: Allocation of a New Dataset 12
FREE TSO/E Command 14
Host Command Environment 15
ADDRESS() Function and Statement 15
SUBCOM TSO REXX Command 16
REXX Components in Non-TSO Address Space 16
REXX - Execution 17
Executing REXX: TSO Address Space in Batch 17
Executing a REXX EXEC in non-TSO Environment 17
ALTLIB - TSO/E Command 18

Chapter 6: REXX Programming

REXX Language - Coding and Debugging 1
Developer Guidelines 1
Uninitialized Variables 2
Variable Scoping 3
PARSE Instruction 4
WITH - Incorrect Use 4
Unexpected Behavior and Results 4
Mismatched Arguments and PARSE Statement 5
CALL Statement Syntax 6
Compound Variables 7
Case Sensitivity in a Compound Variable 7
Inability to Have 'Constant' Values 8
Inability to Have Expressions 10
Strict versus Non-strict Comparison 11
Line Continuation 12
Explicit Concatenation 13
Uppercasing by the CALL Instruction 14
Null Strings versus Empty Strings 15
Case Sensitivity of Strings 16
Condition Handling 17

Chapter 7: REXX: Db2 and VSAM

REXX and Db2 1
SQLCA in REXX Db2 2
SQL and REXX Data Types 3
SQL Statements - Supported 3
Db2 Language Support 5
DSNREXX Host Command Environment 5
Isolation Level 6
Predefined Cursor and Statement Names 6
REXX to Retrieve a Single Row 7
Display SQLCA Information 8
Retrieve All the Rows in a Resultset 8
Update a Table 9
REXXTOOLS to Access VSAM 10
Example: REXX for Accessing VSAM 10

Chapter 8: REXX and Dialog Manager Services

Dialog Manager Services 1
Dialog and Libraries 1
Library Allocation for ISPF 2
Dialog Variables 2
Messages 2
ISPSTART Command 3
Dialogs - Writing 4
Variable Services 4
Compound Procedures 5
VGET, VPUT, and VFE 5
Dialog Program 6
REXX to Display 8
Coding the Panel 8
System Variable - Time and Date 9
Return Codes from Services 9
BROWSE Service - Browse a Data 10
