

# Why SYS-ED for Web-based Training

# Foundation for SYS-ED Web-based Training

---

- The foundation of SYS-ED's web-based training is the application of the Computer Education Techniques courseware library and knowledge base to the lesson plans and standards of the New York State Department of Education - Bureau of Proprietary School Supervision.
- David Shapiro and David Silverberg have completed the courses required by the New York State Department of Education - Bureau of Proprietary School Supervision as part of meeting the teaching, courseware, and classroom management licensing requirements.

# New York State Department of Education Standards

## A PRIVATE CAREER SCHOOL FULL TEACHER LICENSE

has been issued to  
**DAVID M SHAPIRO**

This certificate, valid for service only in licensed private career schools, is granted to the person who has satisfied the requirements prescribed by the State Education Department.

Certification Area:  
Computer Applications - # 21518-11661

Effective Date: 06/24/2021  
Expires On: 06/24/2025

Certification Area:  
Computer Networking Administration - # 21521-11661

Effective Date: 06/24/2021  
Expires On: 06/24/2025

Certification Area:  
Computer Programming - # 11016-11661

Effective Date: 08/30/2021  
Expires On: 08/30/2025

Original issued certificates are on file at SYS-ED.

# Courseware Library - Web Enabling of Content

---

- The Computer Education Techniques courseware library compares favorably to the content and training materials distributed by software companies, purveyors of open source software, and consulting firms in terms of:
  - Narrative explanations.
  - Pre and post course assessment.
  - Sample programs.
  - Diagrams.
  - Skeleton programs.
  - Case studies.
  - Exercises.

# First Generation Experience: UNIX and Open Source Software - 1

- The principals managing SYS-ED developed and taught C programs to a generation of programmers, were involved with the superset of functions which became C++, and wrote handouts and instructor guides for X Windows and Motif interfaces.
- As UNIX became integrated into IBM mainframe operating systems, SYS-ED developed and taught the popular UNIX- and Linux-variant courses.
- Equally as important, we have specialized expertise with hybrid internetworking and development platforms.

# First Generation Experience: Free and Open Source Software - 2

- Our staff is experienced with open source operating systems, web servers, and development languages.
  - UNIX to Linux-variant configuration, internetworking, and administrative scripting.
  - web server configuration, performance optimization, and programming.
  - designing, coding, and debugging Java applications and using development tools.
  - designing and programmatically managing XML data.
  - evaluating the design, and developing code for web browsers and Google Android mobile devices.

# First Generation Experience: Free and Open Source Software - 3

---

- Industry experts agree that most documentation available for supporting open source software does not provide an equivalent degree of clarity and completeness in relation to its commercial counterparts.
- CETi courseware and training aids have been designed to address this shortcoming and provide value-added service.

# Computer Education Techniques Knowledge Base

---

- Content in the CETi knowledge base is derived from the compilation and independent assessment of the accuracy of source information and data from:
  - CETi technology partners
  - Documentation in the public domain
  - Information in the public domain
  - Feedback from SYS-ED courses and integrated training programs
- Content from the knowledge base is selectively added to the courseware.

# Instructor Training Program - 1

---

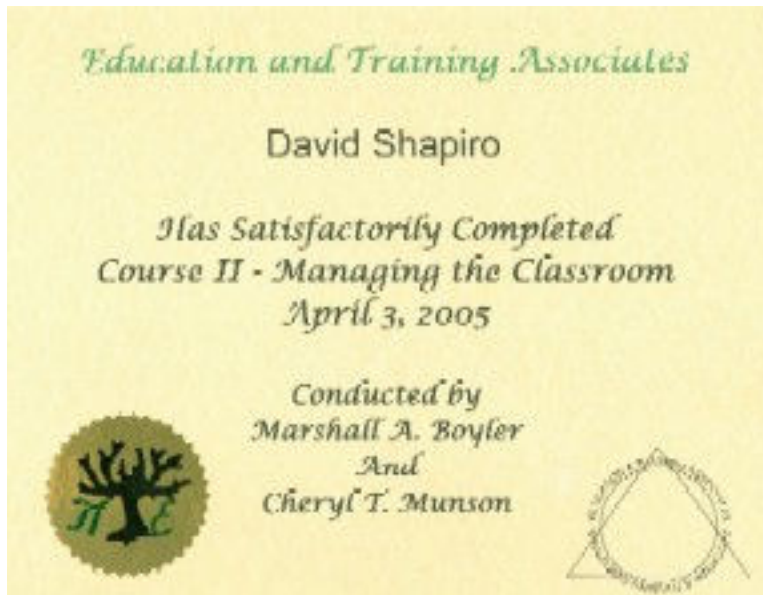

- Computer Education Techniques instructor training program is the unifying element of the training services delivered under the SYS-ED brand.
- Each system consultant is required to generate inputs, contribute independent research, and produce outputs which meet the standards of the New York State Department of Education.
- The training program ensures that the subject matter expert is a qualified teacher with the skillset to effectively utilize technology for presenting information technology subject matter.
  - It is the quality control and professionalism serving as the hallmark of the SYS-ED service.

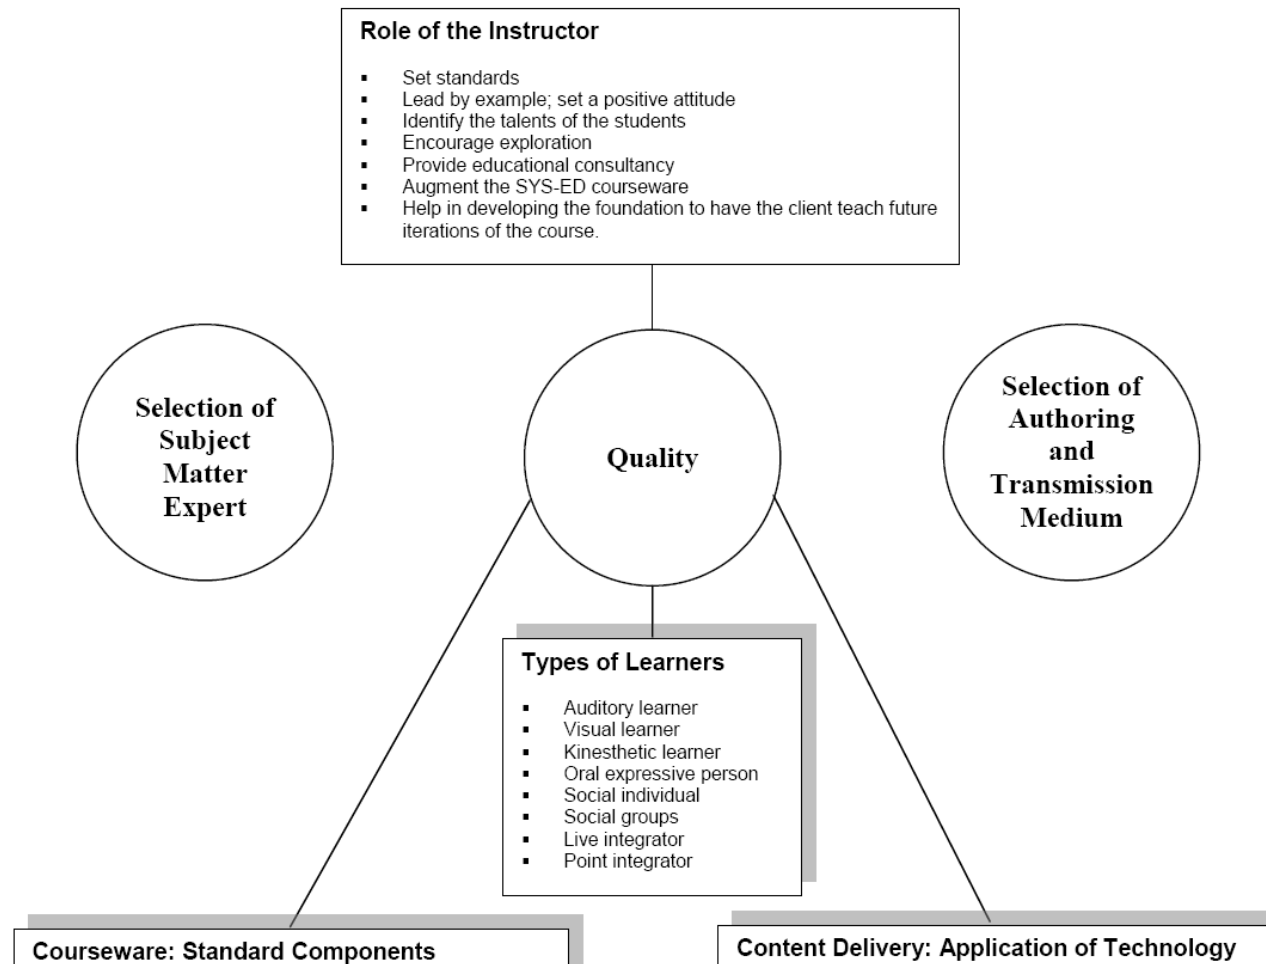

# Instructor Training Program - 2

# Instructor Training Program - 3

# Web Enabled Training - “Professional Training Service”

# Web Enabled Training - Subject Matter Experts

SYS-ED system consultant instructors are subject matter experts who teach in distance- and e-learning virtual classrooms.

# SYS-ED Websites

---

- SYS-ED categorized and software specific websites provide:
  - A course search engine for researching titles, subject matter, and delivery medium.
  - Emerging trends
  - Learning paths.
  - Explanations, inclusive of hyperlinks to technology assessments and interrelated software.
  - Courseware frameworks.
  - Answers to questions.
  - E-mail support for submitting information technology questions.

# Submitting Information Technology Questions

---

Organizations are welcome to submit information technology questions to SYS-ED staff and technology partners.
