

Workshop

z/OS JCL - Basic

Chapter 2:

Using Existing Datasets

CETi/COMPUTER EDUCATION TECHNIQUES, INC.

2-W:1

Exercise 1

- Code and execute the JCL to list the contents of a catalog for a TSO high level qualifier.
 - Perform this using the IEHLIST utility.
 - In the input control card, specify the disk drive where the dataset resides.
 - This information can be obtained from option 3.4 in ISPF.
 - Display the results to the TSO held queue.

2-W:2

Workshop

z/OS JCL - Basic

Exercise 2

- Code and execute the JCL for concatenating two datasets and print all the records in both datasets.
 - Perform this using the IEBGENER utility.
 - The input will be the two datasets supplied in the course setup instructions.
 - The output will be the TSO held queue.
