

Workshop z/OS JCL - Basic

Chapter 3: Creating Datasets

CETi/COMPUTER EDUCATION TECHNIQUES, INC.

3-W:1

Exercise 1

Create a set of JCL that performs the following:

- Step 1.

Use IEFBR14 to create a new disk dataset with the following characteristics:

Dataset Name: uid.FUNDS.DATA

Disposition: Cataloged dataset.

Space: 10 tracks primary space.
5 tracks secondary space.

Attributes: Record length is 110, block size should be determined by the operating system.
Every record is a fixed size.

3-W:2

Workshop

z/OS JCL - Basic

Exercise 1

- Step 2.
 - Use IEBGENER to load 5 records into the file.
 - The first 5 characters of the content will be the identifying key to the record.
- Step 3.
 - Sort the file with the Funds data and store it into a new dataset.
- Step 4.
 - Print the sorted new dataset using IEBGENER.
- Step 5.
 - Delete the sorted new dataset.
