

**Chapter 1: File-AID/RDX Functions**

Related Data Management - Featureset.....	1
FileAID/RDX - Starting .....	2
Primary Options Menu .....	3
Select Profile .....	4
Global User Defaults .....	5
Relationship File .....	7
Object - Selection to Drive the Extract Process .....	8
Extract Request File .....	8
EXPAND Command .....	9

**Chapter 2: Profile**

Profile and Global Profile .....	1
Profile - Option 0 .....	1
Profile Options .....	2
Navigation .....	3
Locking a Profile Value .....	3
Session and Batch Defaults .....	4
Extract Defaults .....	5
Load Defaults .....	7
Permanent File Defaults .....	9
Temporary File Defaults .....	10
Option G - Global User Defaults .....	12

**Chapter 3: File-AID/RDX Utilities**

Utilities: Purpose and Function .....	1
Allocate Relationship File .....	3
Batch RI Load .....	5

**Chapter 4: DB2 RI Relationships**

RI Information - Viewing and Loading .....	1
RI Relationship: Requesting Information - I Line Command .....	3
RI Relationship Information - Viewing .....	4
RI Relationship: Loading Information - S Line Command .....	5
Application Relationships: DB2 Driving Object .....	6
Parent and Dependent Object Types: Specifying .....	9
Relationships: Parent and Dependent Object Types - Adding .....	10
Column Relationship - Creation .....	12
Extended Column Relationship .....	13
Viewing the New Relationship .....	14

**Chapter 5: Extract**

Extract Option .....	1
Driving Object Selection Criteria Screen .....	2
Commands .....	3
Extract - DB2 Driving Object .....	4
Primary Commands .....	4
Field Description .....	5
Specifying Extract Information for z/OS File .....	6
Primary Commands .....	7
z/OS Selection Criteria Menu Screen .....	8
z/OS Formatted Selection Criteria .....	9
Commands .....	11
View z/OS Selection Criteria Screen .....	12
Submitting the Extract JCL .....	13

**Chapter 6: Load**

Selecting a Load Request from the Load Reference List .....	1
Selecting from the Load Menu .....	2
Load Menu Options .....	3
Load Object Specification - Specification .....	5
Source to Target Mapping .....	7
Column Mapping with Default Values .....	8
Specifying Target Environment .....	9

**Chapter 7: Delete**

Delete Features .....	1
Interactive and Execution Phase .....	1
Delete Reference List .....	2
Request File Member List .....	3
Extract File Specification .....	4
Summary File Usage .....	5
Delete Processing Options .....	6
