

**Chapter 1: Assembler Language: Introduction**

Assembler Language ..... 1  
 Machine Instructions ..... 1  
 Assembler Instructions ..... 1  
 Macro Instructions ..... 2  
 Assembly and Link Editing ..... 3  
 Assembler Processing ..... 4  
 Executing the Assembler ..... 5  
 Macro and Copy Libraries ..... 6  
 Control Sections ..... 6  
 DSECTs ..... 7  
 Symbols ..... 7  
 Data in Assembler Program ..... 8  
 Addressability ..... 9  
 Relocability ..... 9  
 Addressing ..... 10  
 Registers ..... 10  
 Establishing Addressability ..... 12  
 Location Counter ..... 14  
 Saving Registers ..... 15  
 Coding Conventions ..... 16  
 Machine Instruction Formats ..... 17  
 Receiving Field in an Operation ..... 17  
 RR Format ..... 18  
 RX Format ..... 20  
 RX: Format - Normal Way of Coding ..... 21  
 RS Format ..... 22  
 SS Format ..... 23  
 SI Format ..... 24  
 Long Control Sections ..... 25

**Chapter 2: Defining Data Constants and Symbols**

Data Types ..... 1  
 Defining Constants ..... 2  
 DC Instruction ..... 2  
 Subfields ..... 3  
 Truncation and Padding ..... 4  
 DC Examples ..... 4  
 Alignment - Constants ..... 5  
 CNOP Instruction ..... 6  
 Defining Literals ..... 7  
 Defining Storage: DS Instruction ..... 8  
 Alignment - Boundary ..... 9  
 Defining Symbols: EQU Instruction ..... 10

**Chapter 6: File Handling**

Access Method ..... 1  
 z/OS File and DCB: Data Control Block ..... 2  
 OPEN Macro ..... 3  
 GET Macro ..... 4  
 PUT Macro ..... 5  
 CLOSE Macro ..... 6

**Chapter 7: Packed Arithmetic**

Pack Instruction ..... 1  
 Symbols to Facilitate Coding ..... 2  
 Conversion ..... 3  
 CVB Instruction ..... 3  
 CVD Instruction ..... 3  
 Symbols to Facilitate Coding ..... 4  
 ZAP Instruction ..... 5  
 Decimal Arithmetic Instructions ..... 6  
 CP Instruction ..... 6  
 Multiply Decimal and Divide Decimal Instructions ..... 6  
 ED - Edit and EDMK - Edit and Mark Instructions ..... 8  
 Pattern - Using Special Bytes ..... 9  
 Message Bytes ..... 9  
 Simple Selection ..... 11  
 Significance - Start Byte Hex 21 ..... 12  
 ED Instruction ..... 14  
 Fill Byte ..... 15  
 Zero Suppression - Significance Off and On ..... 16  
 EDIT and MARK Instruction ..... 18

**Chapter 8: Calls and Linkage**

Subroutines ..... 1  
 Save Areas ..... 2  
 z/OS Considerations ..... 5  
 Register Usage ..... 6  
 CALL Macro ..... 7  
 Parameter List ..... 8  
 Passing Variable Number of Parameters ..... 9  
 BAL: Branch and BALR: Link Instructions ..... 10  
 External References and Entry Points ..... 11  
 EXTRN Statement ..... 11  
 V-type Constant ..... 11  
 Entry Point - Called Routine ..... 12  
 Long Control Sections and Multiple Base Registers ..... 13

**Chapter 3: Assembler Listings**

External Symbol Dictionary ..... 1  
 Source and Object Program ..... 3  
 Relocation Dictionary ..... 4  
 Cross-Reference Table ..... 4  
 Diagnostics and Statistics ..... 5

**Chapter 4: Fixed Point Instructions**

Load Instructions ..... 1  
 L: Load Instruction ..... 1  
 LR Instruction ..... 1-2  
 Load Halfword Instruction ..... 3  
 Load Multiple Instruction ..... 4  
 Store Instructions ..... 5  
 Store Instruction Formats ..... 5  
 STM: Store Halfword Instruction ..... 6  
 STM: Store Multiple Instruction ..... 6  
 LTR: Load and Test Register Instruction ..... 7  
 Add Instructions - A, AR, and AH ..... 8  
 Subtract Instructions - SR, S, and SH ..... 9  
 Conditional Processing ..... 10  
 Codes Used by Instructions ..... 11  
 Condition Codes ..... 12-13  
 Branching - BC and BCR Instructions ..... 14  
 BE Instruction ..... 15  
 B Instruction ..... 15  
 Extended Mnemonic Codes ..... 16  
 LA: Load Address Instruction ..... 17  
 Special Use ..... 17  
 The Limit of 4095 ..... 17-18  
 Branch On Count Instruction - BCT and BCTR ..... 19  
 MR: Multiply Instruction ..... 20  
 Shift Instructions - Shifting Data ..... 21  
 Divide Instructions - DR and D ..... 22

**Chapter 5: Logical Instructions**

Moving Data - MVC Instruction ..... 1  
 MVI Instruction ..... 3  
 CLC: Compare Logical Character Instruction ..... 4  
 CLI: Compare Logical Immediate Instruction ..... 5

**Chapter 9: Table Handling**

RX Instruction Formats ..... 1  
 Arrays ..... 2  
 Tables ..... 3-5  
 LOAD Macro ..... 6  
 DELETE Macro ..... 7  
 Initializing Tables and Arrays ..... 8

**Chapter 10: VSAM Macros**

VSAM Files and Macros ..... 1  
 ACB: Access Method Control Block ..... 2  
 EXLST Macro ..... 4  
 RPL Macro ..... 5  
 OPEN, CLOSE, and TCLOSE Macros ..... 7  
 OPEN Macro ..... 7  
 CLOSE Macro ..... 8  
 TCLOSE Macro ..... 9  
 MODCB Macro ..... 10  
 SHOWCB Macro ..... 11  
 GET, PUT, POINT, ENREQ, and ERASE Macros ..... 12  
 GET Macro ..... 12  
 PUT Macro ..... 12  
 POINT Macro ..... 12  
 ENDREQ Macro ..... 13  
 ERASE Macro ..... 13  
 Return Codes ..... 14  
 ShowCB Macro and Feedback Field ..... 14

**Chapter 11: Assembler Dumps**

Program Check, Dumps, and Debugging ..... 1  
 PSW and Registers ..... 2  
 Using Registers ..... 3  
 Program Relocation ..... 4  
 z/OS Operating System ..... 4

**Chapter 12: More Logical Instruction**

AND Instructions ..... 1  
 OR Instructions ..... 2  
 Non-Exclusive OR Instructions ..... 3  
 Setting Bit Switches ..... 4  
 Exclusive OR Instructions ..... 5  
 TM: Test Under Mask Instruction ..... 7  
 Inserting and Storing One Byte ..... 8  
 IC: Insert Character Instruction ..... 8  
 STC: Store Character Instruction ..... 8  
 EXECUTE Instruction ..... 9  
 BXH: Branch On Index High Instruction ..... 10  
 BXLE: Branch On Index Low or Equal Instruction ..... 11  
 TR: Translate Instruction ..... 12  
 Translation ..... 13  
 TRT Instruction ..... 14  
 CLM: Compare Logical Characters Under Mask Instruction ..... 15  
 ICM: Insert Character Under Mask Instruction ..... 16  
 STCM: Store Character Under Mask ..... 17

**Chapter: 13 31-bit Addressing**

MVS and z/OS: System Architecture ..... 1  
 Addressing Modes ..... 2  
 Assembler Programming with 31-Bit Mode ..... 3  
 BSM - Branch and Set Mode ..... 3  
 BASSM - Branch and Save and Set Mode ..... 3  
 Examples: BASSM and BSM ..... 4
