

**Chapter 1: Table Handling**

Tables - Purpose and Facilities ..... 1  
 Accessing an Item in a Table ..... 2  
 Subscripting ..... 3  
 Indexing ..... 4  
 Loading a Table Dynamically ..... 5  
 Sample Program - Load Table ..... 6  
 Sample Program - Dynamic Load ..... 8  
 Variable-length Tables ..... 9  
 SEARCH - Doing a Serial Search ..... 11  
 Searching a Table ..... 12  
 SET Statement ..... 14  
 Binary Search - SEARCH ALL ..... 15  
 SEARCH ALL Statement ..... 16  
 Sample Program - SEARCH ALL ..... 17

**Chapter 2: Internal Sorts**

Identification Division ..... 1  
 Sorting - What is It? ..... 1  
 Sorting Data Files ..... 1  
 Environment Division - Considerations ..... 2  
 Sort SELECT Format ..... 2  
 Data Division Considerations ..... 3  
 Sort File Description ..... 3  
 Procedure Division Considerations ..... 4  
 SORT Statement Format ..... 4  
 RELEASE Statement Format ..... 5  
 RETURN Statement Format ..... 5  
 Programming Example ..... 6  
 COBOL SORT Verb ..... 6  
 SORT - Output PROC ..... 9  
 Faster Sort Facility ..... 13  
 Example: Fastsort ..... 13  
 Defining Sort Datasets ..... 14  
 Sort - Determining Successful ..... 15  
 Stopping a Sort ..... 16  
 Controlling Sort Behavior ..... 17

**Chapter 3: Compilation**

Compilation and Compiler Listing ..... 1  
 Embedded Compiler Diagnostic Messages ..... 1  
 Improved Cross-Reference of Data Names ..... 2  
 Compiler Message Codes ..... 2  
 Compiler Message Format ..... 3  
 Compiler Options: Uses ..... 4  
 Compiler Options: Specifying ..... 4  
 Hierarchy of Compiler Options ..... 5  
 Compiler Options ..... 6

**Chapter 4: Structured Program Design**

Modularity ..... 1  
 Top-down Design ..... 2  
 Structure Chart / Hierarchy Chart ..... 3  
 Example: Structure Chart ..... 4  
 HIPO: Hierarchical Plus Input, Process, Output, Diagram ..... 5  
 Three Types of Diagrams Associated with a HIPO ..... 6  
 Example: Visual Table of Contents ..... 7  
 Example: Overview Diagram ..... 8  
 Example: Detail Diagram ..... 9  
 Top-down Coding ..... 10  
 Top-down Testing ..... 11  
 Bottom-up Implementation: Problems ..... 12  
 Top-down Testing: Benefits ..... 13  
 Sequence Structure ..... 14  
 Selection Structure ..... 15  
 Iteration Structure ..... 16  
 Case Structure ..... 17  
 PERFORM versus GOTO ..... 18

**Chapter 5: VSAM: Introduction**

VSAM ..... 1  
 VSAM Catalogs ..... 2  
 Logical Record ..... 3  
 Key Field ..... 4  
 Component ..... 5  
 Cluster ..... 6  
 VSAM Datasets ..... 7  
 ESDS: Entry Sequence Datasets ..... 7  
 RRDS: Relative Record Datasets ..... 8  
 KSDS: Key-Sequenced Datasets ..... 8  
 Alternate Indexes and Paths ..... 10  
 Control Interval and Control Areas ..... 12  
 AMS: Access Method Services ..... 13  
 AMS Commands ..... 13  
 Functional Commands ..... 14  
 Modal Commands ..... 15  
 Data Stripping ..... 16

**Chapter 6: COBOL and VSAM**

Defining a VSAM Dataset in a Program ..... 1  
 Sequential Organization ..... 3  
 Indexed Organization ..... 4  
 Relative Organization ..... 4  
 Data Division ..... 5  
 Input and Output Statements for VSAM Files ..... 6  
 Connecting a Program to a VSAM Dataset ..... 7  
 Processing VSAM Datasets ..... 9  
 Current Record Pointer ..... 9  
 Invalid Key Condition ..... 9  
 Reading Records from a VSAM File ..... 10  
 WRITE Statement ..... 11  
 START Statement ..... 13  
 START Program - KSDS ..... 15  
 READ Statement ..... 16  
 Sequential Read - KSDS ..... 17  
 Random Read - KSDS ..... 20  
 Random Read - KSDS ..... 21  
 REWRITE Statement ..... 23  
 DELETE Statement ..... 25  
 Disconnecting a Program from a VSAM Dataset ..... 26  
 FILE STATUS Values ..... 27  
 KSDS and Table ..... 31  
 VSAM Additional File Status Information ..... 36  
 Specifying the Additional File Status ..... 36  
 Interpreting the First File Status ..... 37  
 Displaying the Additional File Status ..... 38

**Chapter 7: Related Programs and Subprograms**

Subprogram ..... 1  
 Subprogram: Advantages ..... 1  
 CALL Types ..... 2  
 Calling and Called Programs ..... 3  
 Building a System Using Subprograms ..... 4  
 CALL Statement ..... 4  
 Example: Calling Program ..... 5  
 COBOL Subprogram Linkage Exchange: Called Program ..... 6  
 Procedure Division Considerations for a Called Program ..... 7  
 Subprogram Termination ..... 7  
 Example: Called and Calling Program ..... 8  
 Called Program: One Entry Point ..... 9  
 Calling Program: Two Entry Points ..... 10  
 Called Program: Two Entry Points ..... 11  
 Passing Data ..... 12  
 Sub Program Linkage ..... 13

OMITTED Arguments ..... 14  
 CALL Formats ..... 15  
 PROCEDURE DIVISION RETURNING ..... 16  
 CALL - RETURNING ..... 16  
 EXTERNAL Clause: Sharing Data ..... 17  
 EXTERNAL Files: Advantages ..... 17

**Chapter 8: Intrinsic Functions**

Function-identifier ..... 1  
 Intrinsic Functions as Reference Modifiers ..... 2  
 Converting Data Items ..... 3  
 Converting to Upper Case or Lower Case ..... 4  
 Converting to Reverse Order ..... 4  
 Converting to Numbers ..... 4  
 Evaluating Data Items ..... 5  
 Evaluating Single Characters for Collating Sequences ..... 5  
 MAX and MIN Functions ..... 6  
 Finding the Length of Data Items ..... 6  
 Date of Compilation - Ascertaining ..... 7  
 CURRENT-DATE ..... 8  
 Table of Functions ..... 9

**Chapter 9: Nested Programs**

Two Approaches to Debugging ..... 1  
 Nested Programs - Advantages ..... 1  
 Example: Nested Programs ..... 1  
 Clauses ..... 2  
 COMMON Clause ..... 2  
 EXTERNAL Clause in File Section ..... 2  
 GLOBAL Clause in File Section ..... 2  
 Variables ..... 3  
 GLOBAL Variable ..... 3  
 External Variable ..... 4  
 Structure of a Nested Program ..... 5  
 Nested Programs ..... 6  
 Conventions - Nested Programs ..... 6  
 Calling - Nested Programs ..... 6  
 Scope of Names in a Nested Structure ..... 7

Chapter 10: COBOL Style and Techniques

Comments in COBOL Programs ..... 1  
 Comment Guidelines ..... 1  
 Formatting Source Code ..... 2  
 Multiple Statements on a Line ..... 3  
 Indentation ..... 3  
 Blank Lines in Source ..... 4  
 Line Up Clauses ..... 4  
 Commas ..... 4  
 Data Names ..... 5  
 Avoid Potential Reserved Words ..... 5  
 Prefixes and Suffixes ..... 6  
 Common Opposites ..... 7  
 Avoid Names that Look Alike ..... 7  
 Abbreviations - Use Carefully ..... 8  
 Cryptic Names ..... 9  
 Naming Flags and Switches ..... 9  
 Paragraph Names ..... 10  
 Paragraph - Describing What it Does ..... 10  
 Numbering Schemes ..... 11  
 An Alternative Style ..... 11  
 GOTO Statement ..... 12  
 Default Clause in a Case Structure ..... 13  
 Short Loops - Use an In-line PERFORM ..... 13  
 Subprograms - Reasons ..... 14  
 Multiple Entry Points ..... 15  
 Subprogram Parameters ..... 15  
 Lumped Parameters ..... 16  
 Error Types ..... 17  
 Fatal Errors ..... 17  
 Non-fatal Errors ..... 17  
 Common Error Conditions ..... 18  
 Error Handling ..... 20  
 Handle Errors from the Beginning ..... 20  
 Test the Error Handling ..... 21  
 Error Reporting ..... 21  
 Different Messages for Different Errors ..... 22  
 Issuing Error Messages ..... 23  
 Check Status Codes ..... 23  
 Aborting a Program ..... 24  
 Spaghetti Code - Rewriting ..... 25  
 Rewriting Code - Incrementally ..... 25

Chapter 11: Unicode Support

Unicode - What is it ..... 1  
 Unicode - Why ..... 1  
 Unicode Support ..... 2  
 Unicode Compiler Options ..... 2  
 Unicode Literals ..... 2  
 Unicode Data Type ..... 2  
 Unicode Compiler Options ..... 3  
 Assignment ..... 4  
 Unicode Compares ..... 4  
 Supporting Unicode ..... 5  
 Intrinsic Functions ..... 6  
 Unicode: DB2 COBOL Programs ..... 7  
 COBOL Unicode Support and XML Processing ..... 8  
 Unicode Example ..... 9
