Mike Murach

Dear Mr. Shapiro,

I thought you might like to see this comment that we recently received from an IS manager on our books:

"The trainers who use your books are obviously very wise and understand the inherent problems with short-term technology training. It is also apparent that they wish to convey the greatest amount of information to their students in the shortest amount of time possible." (Charles T. Blankenship, Director of Software Development, Florida)

I hope you're getting the same kind of feedback directly whenever you use our books in one of your courses!

Now, I want to make sure you know about the 3 books we've published in 2007, on .NET and Java. In case you've missed any of them, just click on the book cover to go to our web site for all the details on the book and its supplementary instructor's materials.

Then, if you need a review copy of any of these books, please email me at kelly@murach.com or call me at
1-800-221-5528.

And if you have any comments or questions, I'd love to hear from you. Thanks!

Kelly Slivkoff, Customer Service Manager
Mike Murach and Associates
Publisher of Professional Programming Books
