=====

Description:

Infotec is a training facility in Virginia Beach, Virginia. We have a contract client that utilizes our training for all services. They currently have a need for Microfocus Cobol training / NET Express for their programmers. Object oriented programming is a critical aspect that they need to cover. It would be training for 4 to 6 individuals and they would prefer this to occur in their location.

Do you have trainers that travel and a course that supports the above requirement?

Many thanks!
