====================================================
Description:

My name is Jonathan Falk, and I am an Account Manager with Computer Visions
in Albany, NY. I have a client in need of Websphere MQ training, for a
group of 14 developers. Specifically, they are interested in 3 classes -
the Technical Intro class, the Application Programming(Windows) class, and
the Debugging class.  The classes would be held at our facility in Albany.
If you are interested in partnering with us on this opportunity, please let
me know and we can discuss further details.

Thank you.
