We want to inform you that your D&B business credit line has been updated.

Did you know that your business credit file can save you money? Your D&B credit file contains critical information that other companies use when deciding how to do business with you. For example, your business credit file may be used to determine:

- The interest you pay on loans.
- The premiums you pay for workers' compensation.
- The payment terms your vendors extend to you.

We recommend that you call **1-866-737-1988** to learn how you can better leverage your file to improve profitability.
